Metadata Jeffrey Pomerantz, 2015 Metadata Jeffrey Pomerantz, 2015-11-13 Everything we need to know about metadata the usually invisible infrastructure for information with which we interact every day When metadata became breaking news appearing in stories about surveillance by the National Security Agency many members of the public encountered this once obscure term from information science for the first time Should people be reassured that the NSA was only collecting metadata about phone calls information about the caller the recipient the time the duration the location and not recordings of the conversations themselves Or does phone call metadata reveal more than it seems In this book Jeffrey Pomerantz offers an accessible and concise introduction to metadata In the era of ubiquitous computing metadata has become infrastructural like the electrical grid or the highway system We interact with it or generate it every day It is not Pomerantz tell us just data about data It is a means by which the complexity of an object is represented in a simpler form For example the title the author and the cover art are metadata about a book When metadata does its job well it fades into the background everyone except perhaps the NSA takes it for granted Pomerantz explains what metadata is and why it exists He distinguishes among different types of metadata descriptive administrative structural preservation and use and examines different users and uses of each type He discusses the technologies that make modern metadata possible and he speculates about metadata s future By the end of the book readers will see metadata everywhere Because Pomerantz warns us it s metadata s world and we are just living in it *Theses on the Metaphors of Digital-Textual History* Martin Paul Eve, 2024-07-16 Digital spaces are saturated with metaphor we have pages sites mice and windows Yet in the world of digital textuality these metaphors no longer function as we might expect Martin Paul Eve calls attention to the digital textual metaphors that condition our experience of digital space and traces their history as they interact with physical cultures Eve posits that digital textual metaphors move through three life phases Initially they are descriptive Then they encounter a moment of fracture or rupture Finally they go on to have a prescriptive life of their own that conditions future possibilities for our text environments even when the metaphors have become untethered from their original intent Why is whitespace white Was the digital page always a foregone conclusion Over a series of theses Eve addresses these and other questions in order to understand the moments when digital textual metaphors break and to show us how it is that our textual softwares become locked into paradigms that no longer make sense Contributing to book history literary studies new media studies and material textual studies *Theses on the Metaphors of Digital Textual History* provides generative insights into the metaphors that define our digital worlds **Anticorruption** Robert I.
