Nice Book Passion Society Suffering California Anthropology:

Beyond Suffering and Reparation Timothy James Bowyer, 2018-11-01 This book presents the key issues debates concepts approaches and questions that together define the lives of rural people living in extreme poverty in the aftermath of political violence in a developing country context Divided into nine chapters the book addresses issues such as the complexities of human suffering losing trust psychic wounds dealing with post traumatic stress situations and disillusionment after change By building knowledge about human and social suffering in a post conflict environment the book counters the objectification of human and social suffering and the moral detachment with which it is associated In addition it presents practical ways to help make things better It discusses new methodological concepts based around empathy and participation to show how the subjective reality of human and social suffering matter Finally the book maps a burgeoning field of enquiry based around the need for linking psychosocial approaches with the actual lived experience of individuals and groups

A Passion for Society Iain Wilkinson, Arthur Kleinman, 2016-01-26 What does human suffering mean for society And how has this meaning changed from the past to the present In what ways does the problem of suffering serve to inspire us to care for others How does our response to suffering reveal our moral and social conditions In this trenchant work Arthur Kleinman a renowned figure in medical anthropology and Iain Wilkinson an award winning sociologist team up to offer some answers to these profound questions A Passion for Society investigates the historical development and current state of social science with a focus on how this development has been shaped in response to problems of social suffering Following a line of criticism offered by key social theorists and cultural commentators who themselves were unhappy with the professionalization of social science Wilkinson and Kleinman provide a critical commentary on how studies of society have moved from an original concern with social suffering and its amelioration to dispassionate inquiries The authors demonstrate how social action through caring for others is revitalizing and remaking the discipline of social science and they examine the potential for achieving greater understanding through a moral commitment to the practice of care for others In this deeply considered work Wilkinson and Kleinman argue for an engaged social science that connects critical thought with social action that seeks to learn through caregiving and that operates with a commitment to establish and sustain humane forms of society
