New Developments in Economic Education Franklin Graves Mixon, Richard J. Cebula, 2014 This innovative book offers targeted strategies for effectively and efficiently teaching economics at both undergraduate and postgraduate levels It provides professors and other teachers of economics various techniques to engage and retain the interest of students and challenges them to apply both knowledge and methodological tools to a range of economic problems An International Perspective on Economic Education William B. Walstad, 2012-12-06 Economics is taught in some form in the secondary schools of nations throughout the world The subject is rarely taught in elementary schools and while economics courses are offered in universities the majority of students end their formal education with secondary school Thus the best opportunity for the economic education of the youth of a nation occurs in secondary schools This book examines economic education at this critical level of the educational system The teaching of economics in secondary schools varies across countries These differences occur because of history the structure of education and other national factors At the same time there are common elements in the economic education of many countries especially in content coverage This contrast between the common features and the uniqueness of economic education in secondary schools of major industrial nations exemplifies the international perspective presented in this book The international perspective is developed in the six sections of the volume The first section discusses why nations should include economics in school curricula and presents a framework for teaching economics that should have global appeal Dissension and consensus on economic issues among North American and European economists are examined in the second section The third section surveys the U S research literature on precollege economic education and assesses the current state of economics instruction in U S schools The economics curricula and educational practices in seven other nations the U K Canada Japan Germany Austria Korea and Australia are described in the fourth and fifth sections The fifth section also presents international comparisons of economic understanding based on national testing in six of those nations The sixth and final section explores the role of economic education in centrally planned economies and its effects on the transition to a market economy using Russia Bulgaria and China as case studies *The New Development Economics* Jomo K.S., Ben Fine, 2006 This volume provides a critique of the post Washington Consensus in neoliberal economics Principles and Pluralist Approaches in Teaching Economics Samuel Decker, Wolfram Elsner, Svenja Flechtner, 2019-06-28 This volume is a state of the art compilation of diverse and innovative perspectives principles and a number of practiced approaches of fields courses and methods of pluralist economics teaching It fosters constructive controversy aiming to incite authors and commentators to engage in fruitful debate The complex economic problems of the 21st century require a pluralist real world oriented and innovative discipline of economics capable of addressing and teaching those complex issues to students from diverse perspectives This volume addresses a number of key questions Which models could be taught outside the equilibrium and optimality paradigm Which methods could help to improve our

understanding of the complex globalized economy How can qualitative and quantitative methods be combined in a fruitful way to analyze complex economic problems How can the academic isolation of mainstream economics that has developed over many decades be overcome despite its attempted transdisciplinary imperialism What role should knowledge from other disciplines play in teaching economics and what is the relevance of transdisciplinarity Through examining these issues the editors and authors have created a pluralist but cohesive book on teaching economics in the contemporary classroom drawing from ideas and examples from around the world Principles and Pluralist Approaches in Teaching Economics is a unique collection of diverse perspectives on the methodology and applications of pluralist economics teaching It will be a great resource for those teaching economics at various levels as well as researchers and intermediate and advanced students searching for pluralism in economics
