New Humanitarians International Practice Humanitarian:

The New Humanitarians in International Practice Zeynep Sezgin, Dennis Dijkzeul, 2015-12-14 As humanitarian needs continue to grow rapidly humanitarian action has become more contested with new actors entering the field to address unmet needs but also challenging long held principles and precepts This volume provides detailed empirical comparisons between emerging and traditional humanitarian actors It sheds light on why and how the emerging actors engage in humanitarian crises and how their activities are carried out and perceived in their transnational organizational environment It develops and applies a conceptual framework that fosters research on humanitarian actors and the humanitarian principles In particular it simultaneously refers to theories of organizational sociology and international relations to identify both the structural and the situational factors that influence the motivations aims and activities of these actors and their different levels of commitment to the traditional humanitarian principles It thus elucidates the role of the humanitarian principles in promoting coherence and coordination in the crowded and diverse world of humanitarian action and discusses whether alternative principles and parallel humanitarian systems are in the making This volume will be of great interest to postgraduate students and scholars in humanitarian studies globalization and transnationalism research organizational sociology international relations development studies and migration and diaspora studies as well as policy makers and practitioners engaged in humanitarian action development cooperation and migration issues

Humanitarianism and Challenges of Cooperation Volker Heins, Kai Koddenbrock, Christine Unrau, 2016-02-05 Humanitarianism as a moral concept and an organized practice has become a major factor in world society It channels an enormous amount of resources and serves as an argument for different kinds of interference into the internal affairs of countries and regions At the same time and for these very reasons it is an ideal testing ground for successful and unsuccessful cooperation across borders Humanitarianism and the Challenges of Cooperation examines the multiple humanitarianisms of today as a testing ground for new ways of global cooperation General trends in the contemporary transformation of humanitarianism are studied and individual cases of how humanitarian actors cooperate with others on the ground are investigated This book offers a highly innovative empirically informed account of global humanitarianism from the point of view of cooperation research in which internationally renowned contributors analyse broad trends and present case studies based on meticulous fieldwork This book will be of great interest to students and researchers in the areas of political science international relations and humanitarianism It is also a valuable resource for humanitarian aid workers

Humanitarianism from Below Alejandro Olayo-Méndez, 2025-08-05 Challenges the definition of humanitarian aid Aside from being one of the most important migration corridors in the world Mexico is becoming an immigrant destination itself with more and more migrants deciding or needing to stay in the country after failing to enter the United States In the absence of state aid migrant shelters have emerged as an informal welfare system for migrants asylum seekers refugees and deportees in Mexico Largely run by faith

based humanitarian organizations these shelters have grown significantly in recent years Humanitarianism from Below examines the significance of these casas de migrantes migrant shelters in the migration process in Mexico The book also reviews the role of faith based humanitarian organizations whose engagement with migrants is perceived more as charity work than professional humanitarian work The volume argues that faith based humanitarian organizations work challenges traditional understandings of what counts as humanitarian aid It makes the case that in order to understand the full ecology of migration we need to understand not only how large organizations like the Red Cross work but also how these smaller and local entities with fewer resources interact with migrants on their journeys Most migration research tends to focus on its impact within home countries or in destination contexts rarely focusing on the actual migration process including the interactions that influence the course of the migration journey itself In conducting this research Alejandro Olayo M ndez traveled along migrant routes several times in order to gain knowledge about how migrants move and how they interact with the migrant shelters He offers a detailed look at the experiences and challenges of casas de migrantes in Mexico situating these faith based shelters as an integral part of Mexico s humanitarian ecosystem *Humanitarian Shame and Redemption* Heidi Mogstad,2023-12-08 Following the 2015 refugee crisis many different actors emerged to contest or mitigate the EU s border policies This book explores the birth and trajectory of a Norwegian volunteer organisation A Drop in the Ocean established by a mother of five with no prior experience in humanitarian work Drawing on eighteen months of ethnographic fieldwork Heidi Mogstad examines the organisation s shifting and contested efforts to fill humanitarian gaps in Greece while witnessing and shaming the Norwegian public and politicians into action Moving beyond existing critiques of humanitarian sentiments like pity and compassion the book focuses specifically on the work of shame and other negative emotions

People, Aid and Institutions in Socio-economic Recovery Dorothea Hilhorst,Bart Weijs,Gemma van der Haar,2017-02-17 An estimated 2 billion people live in countries affected by fragility conflict and violence Extreme poverty is increasingly concentrated in these areas and governments and international agencies seek avenues to enable socio economic recovery and to support people as they try to rebuild their lives and livelihoods People Aid and Institutions in Socio economic Recovery Facing Fragilities provides an in depth understanding of people s strategies in the face of conflict and disaster related fragility and examines how policies and aid interventions enable their socio economic recovery or fail to do so Through field based research the book captures the complex and unfolding realities on the ground exploring the interfaces between economic social and institutional change This provides a rich and unique vantage point from which to reflect on the impact of recovery policies The book provides a set of cross cutting findings that aim to inform policy and practice The detailed case studies of the book lay bare key dynamics of recovery Set against the findings from two chapters that review the literature the cases provide evidence based lessons for socio economic recovery The chapters combine qualitative and quantitative methodologies and form a valuable resource to researchers and postgraduate students of disaster management

conflict humanitarian aid and social reconstruction and development management *Hierarchies and exclusion in humanitarianism* Clara Egger, 2025-06-24 While humanitarians generally present themselves as do gooders and use this image to gather support and funding this edited volume addresses hierarchies and exclusions in humanitarianism an issue that has gained increased attention Contributions analyse how hierarchies power asymmetries and exclusion emerge are maintained and can ultimately be challenged in humanitarian governance Leading scholars on humanitarianism coming from a variety of disciplinary fields such as international relations philosophy organisational science and management and sociology analyse exclusion dynamics at the individual organisational and structural levels Authors thereby combine data from a diverse range of methods including ethnography survey and statistical analysis The volume informs current efforts to increase inclusiveness and equity in humanitarian practice *Humanitarian Futures* Randolph C. Kent, 2024-09-19 Humanitarian Futures Challenges and Opportunities explores the increasing types dimensions and dynamics of crises threatening the world in the twenty first century and argues that those with humanitarian roles and responsibilities can only meet such challenges if their approaches to strategic and operational planning undergo fundamental paradigmatic shifts Strategically and operationally such shifts must begin by planning from the future for the future Author Randolph C Kent the UN s first Humanitarian Coordinator with experience in some of the most complex crises of modern times including Rwanda Ethiopia Kosovo Sudan and Somalia provides a blueprint for dealing with ever greater complexity on planet Earth and beyond That blueprint is not about upgrading existing tools or relying upon tried precedence Rather it points to a new paradigm for meeting crises It begins by looking at the changing nature of humanness and governance and then turns to plausible future crises based on such changes before concluding with practical steps for dealing with ever more complex humanitarian threats now and in the future This book will be an essential read for humanitarian policymakers and practitioners as well as for humanitarian and global studies researchers and students who are and want to be engaged in understanding and preparing for ever more complex and unpredictable humanitarian challenges Natural Hazards, Risk and Vulnerability Roanne van Voorst, 2016-02-05 Different people handle risk in different ways The current lack of understanding about this heterogeneity in risk behaviour makes it difficult to intervene effectively in risk prone communities Natural Hazards Risk and Vulnerability offers a unique insight in the everyday life of a group of riverbank settlers in Jakarta one of the most vulnerable areas worldwide in terms of exposure to natural hazards Based on long term fieldwork the book portrays the often creative and innovative ways in which slum dwellers cope with recurrent floods The book shows that behaviour that is often described as irrational or ineffective by outside experts can be highly pragmatic and often effective This book argues that human risk behaviour cannot be explained by the risk itself but instead by seemingly unrelated factors such as trust in authorities and aid institutions and unequal power structures By considering a risk as a lens that exposes these factors a completely new type of analysis is proposed that offers useful insights for everyone concerned about how

people cope with the currently increasing amount of natural hazard This is a valuable resource for academics researchers and policy makers in the areas of risk studies disaster and natural hazard urban studies anthropology development Southeast Asian studies and Indonesia studies *Refugee Reception and Camps* Lucas Oesch,Léa Lemaire,2025-10-14 Available open access digitally under CC BY NC ND licence This edited collection provides new insights into refugee reception and camps by focusing on the overlap between local and global dynamics in the governance of camps providing valuable insights to understand the complex realities of refugee camps around the world Humanitarianism Tim Allen,Anna Macdonald,Henry Radice,2018-06-27 The field of humanitarianism is characterised by profound uncertainty by a constant need to respond to the unpredictable and by concepts and practices that often defy simple or straightforward explanation Humanitarians often find themselves not just engaged in the pursuit of effective action but also in a quest for meaning That is the starting point for this book Humanitarian action has in recent years confronted geopolitical challenges that have upended much of its conventional modus operandi and presented threats to its foundational assumptions and legal frameworks The critical interrogation of the purpose practice and future of humanitarian action has yielded a rich new field of enquiry humanitarian studies and many thoughtful books articles and reports So the question arose as to the most useful way to provide a critical overview that might serve to bring some definitional clarity as well as analytical rigor to the waves of critique and shifting sands of humanitarian action Humanitarianism A Dictionary of Concepts provides an authoritative analysis that attempts to rethink rather than merely problematize or define the issues at stake in contemporary humanitarian debates It is an important moment to do so Just about every tenet of humanitarianism is currently open to question as never before

Batman Saves the Congo Alexandra Cosima Budabin, Lisa Ann Richey, 2021-06-08 How celebrity strategic partnerships are disrupting humanitarian space Can a celebrity be a disrupter promoting strategic partnerships to bring new ideas and funding to revitalize the development field or are celebrities just charismatic ambassadors for big business Examining the role of the rich and famous in development and humanitarianism *Batman Saves the Congo* argues that celebrities do both and that understanding why and how yields insight into the realities of neoliberal development In 2010 entertainer Ben Affleck known for his superhero performance as Batman launched the Eastern Congo Initiative to bring a new approach to the region's development This case study is central to *Batman Saves the Congo* Affleck's organization operates with special access diversified funding and significant support of elites within political philanthropic development and humanitarian circuits This sets it apart from other development organizations With his convening power Affleck has built partnerships with those inside and outside development staking bipartisan political ground that is neither charity nor aid but good business Such visible and recognizable celebrity humanitarians are occupying the public domain yet not engaging meaningfully with any public argues *Batman Saves the Congo* They are an unruly bunch of new players in development who amplify business solutions As elite political participants celebrities shape development practices through strategic partnerships that are both an innovative way to raise awareness and funding for neglected causes and a troubling trend of unaccountable elite leadership in North South relations *Batman Saves the Congo* helps illuminate the power of celebritized business solutions and the development contexts they create

Humanitarians on the Frontier Alasdair Gordon-Gibson, 2021-11-17 The book examines the reasons behind accusations of dysfunctional humanitarian identities and the loss of space for impartial action Through a combination of practical examples in case studies from the field with a theoretical and philosophical approach to questions of voluntary service community and identity it reconsiders the exceptional discourse that constructs these identities and drives humanitarian response in environments of complex emergency By recognizing both the strength and the limits of its social and political agency the study presents opportunities for the construction of a less exceptional space or niche within the humanitarian sector where the politics is around one of an ordinary humanitarian society instead of an ordered humanitarian system
