## **Neuropsychology Of Epilepsy And Epilepsy Surgery Aacn Workshop Series:**

*Neuropsychology of Epilepsy and Epilepsy Surgery* Gregory P. Lee, 2010-03 Classification of epilepsy disorders Epilepsy syndromes Diagnostic tests in epilepsy Medical treatment of epilepsy Neuropsychological assessment in epilepsy Psychological and psychiatric disorders in epilepsy Psychogenic nonepileptic seizures Neuropsychological assessment in epilepsy surgery Other neuropsychological procedures in epilepsy surgery Medical aspects of epilepsy surgery

**Neuropsychology of Epilepsy and Epilepsy Surgery** Gregory P. Lee, 2010-03-01 This book is a reference resource for neuropsychology practitioners that covers the classification of epileptic disorders epilepsy diagnostic and treatment cognitive and psychiatric consequences of seizures neuropsychological assessment in epilepsy and epilepsy surgery evaluation and treatment including cortical mapping and Wada testing with an emphasis on the neuropsychologist's role in these endeavors

Executive Functioning Yana Suchy, 2015-11 The book offers an in depth comprehensive and clinically applicable analysis of executive functioning EF Five subdomains of EF are described For each subdomain elemental neurocognitive processes neuroanatomic underpinnings the role of the subdomain in execution of daily tasks neuropsychological assessment approaches and associated clinical syndromes and clinical populations are described **The ^ABusiness of**

**Neuropsychology** Mark Barisa, 2010-03-01 The purpose of The Business of Neuropsychology is to provide a practical overview of basic business principles and how they can be used to enhance the stability and fiscal responsibility of neuropsychological practice *A Practical Guide to Geriatric Neuropsychology* Susan McPherson, Deborah

Koltai, 2018-03-01 A Practical Guide to Geriatric Neuropsychology focuses on the skills required in testing and treating the older adult population Topics discussed include normal aging determining competency important factors to consider in conducting clinical interviews the importance of evaluating for depression and substance abuse screening tools for use in practice cognitive training and intervention and evaluation of the older adult in the workplace This book will be helpful for neuropsychologists interested in testing and providing recommendations for older adults and for psychologists interested in treating older adults **The ^AIndependent Neuropsychological Evaluation** Howard J. Oakes PsyD, David W. Lovejoy

PsyD, Shane S. Bush PhD, 2017-05-10 This book provides an overview of the context and specific issues that arise when performing disability related independent evaluations with a focus on neuropsychological assessment **Board**

**Certification in Clinical Neuropsychology** Kira E. Armstrong, PhD, ABPP, Dean W. Beebe, PhD, ABPP, Robin C. Hilsabeck, PhD, ABPP, Michael W. Kirkwood PhD, ABPP, 2019-05-01 Board Certification in Clinical Neuropsychology is a how to book written in supportive language Its goal is to motivate encourage and provide concrete tools to get through a tough multi step examination process The audience is primarily individuals seeking board certification in clinical neuropsychology but includes practicing neuropsychologists students and those who are training students Supervision in Neuropsychology

Doug Bodin, Kirk J. Stucky, Shane S. Bush, 2022 Supervision in Neuropsychology offers a review of theoretical practical and

ethical considerations for professionals providing supervision in clinical neuropsychology The book covers competency structural and practical issues ethical considerations diversity and inclusion in supervision future challenges and more It concludes with 8 appendices for easy reference *Board Certification in Clinical Neuropsychology* Kira E. Armstrong, 2019 Board Certification in Clinical Neuropsychology is a how to book written in supportive language Its goal is to motivate encourage and provide concrete tools to get through a tough multi step examination process The audience is primarily individuals seeking board certification in clinical neuropsychology but includes practicing neuropsychologists students and those who are training students **Intellectual Disability** Michael D. Chafetz, 2015 This book on intellectual disability ID and the law provides helpful guidelines for assessing validity in low functioning claimants It charts recent advances in psychological and neuropsychological assessment pertaining to civil and criminal proceedings while examining issues such as validity and motivation assessments of disability criminal and civil capacities capital cases Miranda waiver cases and others

**Mild Cognitive Impairment and Dementia** Glenn E. Smith, Mark W. Bondi, 2013-01-31 In 2011 National Institute on Aging and Alzheimer s Association joint task forces released proposed criteria for Alzheimer disease diagnosis These proposals included revisions to the nearly 30 year old NINDS ADRDA criteria for Alzheimer s diagnosis and added criteria for diagnosis of Mild Cognitive Impairment MCI due to Alzheimer s disease The same year the American Psychiatric Association proposed new criteria for major and minor neurocognitive disorders the entities previously known as dementia and mild cognitive impairment respectively These new criteria reflect the research and clinical advances in identifying mild cognitive impairment and offer new opportunities for prevention treatment and management of neurodegenerative conditions A major focus of this book is on the mild cognitive impairment prodrome of the common dementias In addition to discussing the most common neurodegenerative conditions many rare neurodegenerative conditions are highlighted Most chapters include an autopsy confirmed case presentation from the authors files Following the case presentation those chapters present current diagnostic criteria epidemiology neuropathology neurophysiology genetics neuroimaging studies as relevant associated clinical features differential neuropsychological features and possible interventions for each disorder The pace of change in research and practice in the field of normal cognitive aging and dementia is increasing almost as fast as the median age of the population The massive baby boom population bubble is currently entering the age of risk for neurodegenerative conditions Neuropsychologists will play a major role in refining and applying these diagnoses and in developing testing and refining interventions for these diagnoses and in caring for this population This book is intended to prepare neuropsychologists and others interested in neuropsychology to serve this fastest growing segment of our population

*Cognitive Remediation of Executive and Adaptive Deficits in Youth (C-READY)* Donna L. Murdaugh, Kathleen M. O'Toole, Tricia Z. King, 2023 In order to best understand the impact an intervention can have on pediatric patients a basic understanding of both brain development and brain injury are necessary Initial theories of brain injury proposed an

advantage of early age suggesting greater plasticity of the brain However growing literature supports the contrasting heuristic provided by Maureen Dennis 1 This widely accepted theory emphasizes the increased vulnerability of the developing brain Instead of focusing solely on the age of the child at brain injury to illustrate the vulnerability of the brain Dennis recommends examining the extent to which a skill is developed at the time of injury

### **Deep Brain Stimulation**

Associate Professor Departments of Neurology and Psychiatry Christina A Palmese, Christina A. Palmese, Clinical Neuropsychologist Department of Neurology Kathryn A Wyman-Chick, Kathryn A. Wyman-Chick, Michele K. York, Professor of Neurology and Psychiatry and Behavioral Sciences Michele K York, 2025-10-23 This book provides a multidisciplinary guide for identifying and treating people who could benefit from deep brain stimulation DBS DBS is a type of neurosurgery that is highly effective for managing symptoms in people with movement disorders obsessive compulsive disorder and epilepsy It also is being used to treat patients with severe depression anxiety and pain among others This book is geared toward all learners and experienced clinicians who work with these populations

### **Handbook on the Neuropsychology of Epilepsy**

William B. Barr, Chris Morrison, 2014-12-02 Once feared and misunderstood even among the medical community epilepsy has since largely been demystified Besides the characteristic seizures various cognitive behavioral and emotional difficulties are recognized as associated with the condition and patients are finding relief in medical management and or surgical intervention Not surprisingly neuropsychology has emerged as a major component in treatment planning program development and assessment of surgical candidates Geared toward beginning as well as veteran clinicians the Handbook on the Neuropsychology of Epilepsy offers readers a skills based framework for assessment and treatment using current evidence and standardized terminology Expert coverage reviews widely used methods for evaluating key aspects of patient functioning MRI MEG electrocortical mapping the Wada test and presents guidelines for psychotherapeutic and cognitive remediation strategies in treating comorbid psychiatric conditions Given the diversity of the patient population additional chapters spotlight issues specific to subgroups including high and low functioning as well as geriatric and pediatric patients This integrative hands on approach benefits a range of practitioners across medical and neurological settings Topics featured in the Handbook Neuropsychological assessment across the lifespan Evaluating the epilepsy surgical candidate methods and procedures The Wada test current perspectives and applications Assessing psychiatric and personality disorders in the epilepsy patient Evaluation and management of psychogenic non epileptic attacks Neuropsychological assessment with culturally diverse patients Practical and flexible in its coverage the Handbook on the Neuropsychology of Epilepsy serves not only neuropsychologists and neurologists but also primary care physicians such as internists family physicians and pediatricians

### **Neuropsychology in the Care of People with Epilepsy**

Christoph Helmstaedter, Bruce Hermann, Maryse Lassonde, Philippe Kahane, Alexis Arzimanoglou, 2011 Having appeared in the 1930s in Montreal standardised neuropsychological evaluation has become an essential tool in the clinical diagnosis and evaluation of surgical epileptic

patients Nevertheless despite great progress over the last 20 to 30 years in the diagnosis and medical treatment of epilepsy clinical neuropsychology still remains largely associated with surgical epilepsy particularly surgery of the temporal lobe Clinical neurology has still not managed to clear a way in the daily practice with patients with all types of epilepsy despite significant advances in cognitive neuroscience and a large number of clinical studies on epilepsy and cognition How is it that there are only rarely major advances in the field of clinical neuropsychology It has long been time for this question to be asked and for an attempt to be made to bring about changes This was the aim of the Toronto workshop and the result of this book Every approach was debated providing important elements to reflect on and allowing a great forum for exchanges This book includes the communications from the main participants and comments from some others on specific subjects **The Neuropsychology of Epilepsy** Thomas L. Bennett, 2013-06-29 This was an exciting project to work on and I attempted to obtain a broad sampling of current research on the neuropsychology of epilepsy Because the emphasis of the book takes a neuropsychological perspective on epilepsy the coverage is not redundant with previous texts on this topic The book is organized around three themes although individual chapters certainly often extend beyond the part in which they are located The three major topics are the nature of epilepsy cognitive and emotional consequences of epilepsy and treatment approaches to epilepsy and outcome In Part I following a historical overview of epilepsy in Chapter 1 by Sandra D Haynes and me Gerald C McIntosh presents a conceptualization of the epilepsies from a neurologist's perspective The characteristics of seizure types are discussed and the etiology of secondary epilepsies is described Epileptic syndromes are considered McIntosh outlines clinical seizure patterns associated with seizures originating from different cortical regions

**Neuropsychology of Childhood Epilepsy** Isabelle Jambaqué, Maryse Lassonde, Olivier Dulac, 2001-11-30 While a great number of textbooks have been devoted to various medical aspects of childhood epilepsy none have been as comprehensive and forthright as *Neuropsychology of Childhood Epilepsy* Devoted to the neuropsychological description of childhood epilepsy the editors have uncovered this neurological condition as never before Divided into three sections section one may be highly regarded as a necessary introduction to the neuropsychological basis of childhood epilepsy electro clinical patterns of various types of epilepsy and brain maturation while section two delves into the characterization of the neuropsychological profile that accompanies focal epilepsies leading to the behavioral and cognitive impairments linked to the transient events that often go unnoticed Part three covers the medical surgical and socio educational management of childhood epilepsy Absenteeism learning difficulties and cognitive dysfunctions may have an impact on a child's self esteem and upon his or her quality of life The final part of the volume therefore presents an accurate account of the vast psychological consequences of this disease This volume is a must read for experimental and cognitive neuropsychologists medical specialists involved in the care of children with epilepsy and professionals and caretakers dealing with the different aspects of childhood epilepsy alike

Surgical Treatment of Epilepsies Josef Zentner, 2020-10-20 This book fills the gap between the increasing demand for

epilepsy surgical experience and limited training facilities in this area It comprehensively describes surgical techniques including tricks and pitfalls based on the author s 30 years of experience providing optimal and effective training for young neurosurgeons by avoiding learning by trial and error Moreover it also includes useful information for epileptologists and other professionals involved in the epilepsy surgical program to allow them to gain a better understanding of possibilities and limitations of epilepsy surgery     Epilepsy Surgery and Intrinsic Brain Tumor Surgery Konstantinos Fountas,Eftychia Z. Kapsalaki,2018-10-03 This book provides a comprehensive and practical guide for the safe and efficient management of patients with intrinsic brain tumors and medically intractable epilepsy It presents in an easily understandable way the preoperative evaluation of these patients starting from the clinical interpretation of conventional anatomical MR imaging and analyses the clinical significance of newer MR based imaging techniques such as diffusion and perfusion imaging It demonstrates with clarity the role of MR spectroscopy and fractional anisotropy and diffusion tensor imaging in the preoperative assessment of these patients and how this data can be incorporated into the surgical planning This book is aimed at neurosurgeons neuroradiologists neurologists and epileptologists and may also be of interest to neuropsychologists neurophysiologists radiation oncologists and medical physicists     Long-Term Outcomes of Epilepsy Surgery in Adults and Children Kristina Malmgren,Sallie Baxendale,J. Helen Cross,2015-05-25 This book provides a comprehensive rigorous review of the long term outcome literature in epilepsy surgery in both adults and children Each chapter examines the long term outcome literature in a separate domain covering seizure control social vocational educational and psychiatric outcomes Behavior and cognition are also discussed The clinical predictors of good and bad outcomes in each domain are described and the gaps in current knowledge are highlighted Separate chapters examine the methodological challenges associated with long term outcome studies and the special considerations associated with informed consent in this population Long Term Outcomes of Epilepsy Surgery in Adults and Children is essential reading for all members of multidisciplinary epilepsy surgery teams including neurosurgeons neurologists and neuropsychologists it will enable these teams to counsel patients and parents who are considering epilepsy surgery as a therapeutic option

Thank you for reading **Neuropsychology Of Epilepsy And Epilepsy Surgery Aacn Workshop Series**.
