## **Neurotrauma New Insights Into Pathology And Treatment:**

**Neurotrauma: New Insights into Pathology and Treatment** John T. Weber, Andrew I.R. Maas, 2007-07-27

Neurotrauma is the leading cause of death and disability in young adults and the incidence in older patients is increasing. Neurotrauma is also a field in medicine with one of the highest unmet needs. Concentrated focused and multidisciplinary efforts are required to combat this important disease. Exciting findings from basic research open opportunities for improving treatment results. This volume presents a unique and comprehensive overview of the latest findings and insights on translational research in neurotrauma. This book should be a must for any TBI or SCI researcher interested in translating their work to the clinic as well as to clinicians interested in the latest research findings which could provide novel treatment strategies for their patients. Integrates results from research on traumatic brain injury and spinal cord injury bridging basic science and clinical research. Includes contributions from a worldwide panel of leading researchers and clinicians in the fields of TBI and SCI.

**Crisis in the American Heartland -- Coming Home** George W. Doherty, 2013-03-01. Veterans in rural communities face unique challenges who will step up to help. Beginning with a brief scenario of a more gentle view of rural life the book moves through learned information about families children and our returning National Guard and Reserve civilian military members. Return experiences will necessarily be different in rural and frontier settings than they are in suburban and urban environments. Our rural and frontier areas especially in Western states with more isolated communities less developed communication and limited access to medical psychological and social services remain an important concern. This book helps provide some informed direction in working toward improving these as a general guide for mental health professionals working with Guard and Reserve members and families in rural frontier settings. An appendix provides an in depth list of online references for Traumatic Brain Injury TBI. Specific areas of concern include Morale deployment abroad and stress factors. Effects of terrorism on children and families at home. Understanding survivor guilt. Post Traumatic Stress Disorder PTSD and suicide. Preventing secondary traumatization. Resiliency among refugee populations and military families. Adjustment and re integration following the Iraq and Afghanistan Wars. Vicarious trauma and its effects on children and adults. How rural and remote communities differ from more urban ones following war experiences in readjusting military members. Characteristics important in therapists counselors working with returning military.

Doherty's second volume in this new series *Crisis in the American Heartland* explores these and many other issues. Each volume available in trade paper hardcover and eBook formats. Learn more at [www.RMRIInstitute.org](http://www.RMRIInstitute.org)
