## GENERAL INFORMATION

This manual covers the electronic/electrical portion of the Bale Command Plus system. Refer to the baler operator's manual for the mechanical portion of the Bale Command Plus system.

Bale Command Plus is a computerized control system that allows the operator to visually and audibly know when to shift the baler from one side of the windrow to the other for proper feeding of the round baler. The controller also provides the operator with the ability to select the desired number of twine or net wraps on the bale and wraps the bale automatically. The system retains the selected wrap program as long as desired but can be easily reprogrammed. The Bale Command Plus system also controls operation of the Bale Slice™ system knives on balers equipped with that option.

**NOTE:** The Bale Command Plus system is designed for use with a 12-volt negative ground system only.

### BALE COMMAND PLUS SYSTEM COMPONENTS

The Bale Command Plus system includes the components that are shown in Figures 1-1 through 1-13. The components are connected together by wiring harnesses.

### TRACTOR-MOUNTED COMPONENTS

#### Operator's Panel

Figure 1-1 is a front view of the Bale Command Plus operator's panel. The main display window, 1, contains various segments that are activated during operation. The bale shape display window, 2, contains bar graphs that are activated by signals from the bale shape sensors.

An audible alarm is located at 3, and an alarm light is at 4. The alarm volume can be increased or decreased by opening or closing the gate over the horn.

Touch-sensitive keys are located beside and below the display panels to allow the operator to control the system. Each key is marked to indicate its function. Anytime a key is depressed, an audible signal (beep) will sound to alert the operator that the signal was recognized by the controller.
