Stuff We All Should Know Brien Roche, 2021-03-08 This book is a book of knowledge It is not intended to go into depth in any one subject matter Rather it gives an overview of many different subject areas such as the sciences history philosophy and literature With that type of an overview one can then focus on specific areas of interest and make a decision either then to become a subject matter expert in a specific area or simply to broaden one s knowledge in a multitude of areas The first part of the book deals with the basics The basics are such things as physics chemistry biology weather the oceans astronomy the human body language writing and money With an understanding of those basics hopefully the reader will have a better appreciation of the interaction between chemistry physics and biology Hopefully the reader will have a keener appreciation of how weather oceans and astronomy are interrelated The reader will also have a better understanding of not only how the human body works but also how the human brain deals with language and has developed writing Finally as part of the basics there is a chapter that deals with the economy and how money works Part II deals with history and in particular the role of freedom As one of the professors in this book states the role of freedom is probably overrated in the course of human history Many historians espouse the idea that all people crave freedom Rather

what they really crave is order food on the table and a roof over their head If they have those things then they have the luxury of seeking to be free The final part of the book deals with specific people of the world including the Vikings the Mongolians the Chinese and many more The Power of Stars Bryan E. After Sibelius: Studies in Finnish Music Tim Howell, 2017-07-05 During the last twenty years the rest of the world has come to focus on the music of Finland The seemingly disproportionate creative energy from this small country defies prevalent trends in the production of classical music Tim Howell provides an engaging investigation into Finnish music and combines elements of composer biography and detailed analysis within the broader context of cultural and national identity The book consists of a collection of eight individual composer studies that investigate the historical position and compositional characteristics of a representative selection of leading figures ranging from the beginning of the twentieth century to the present day These potentially self-contained studies subscribe to a larger picture which explains the Sibelian legacy the effect of this considerable influence on subsequent generations and its lasting consequences an internationally acclaimed school of contemporary music Outlining a particular perspective on modernism Howell provides a careful balance between biographical and analytical concerns to allow the work to be accessible to the non specialist Each composer study

offers a sense of overview followed by progressively more detail Close readings of selected orchestral works provide a focus while the structure of each analysis accommodates the different levels of engagement expected by a wide readership The composers under consideration are Aarre Merikanto Erik Bergman Joonas Kokkonen Einojuhani Rautavaara Aulis Sallinen Paavo Heininen Kaija Saariaho and Magnus Lindberg The concluding discussion of issues of national distinctiveness and the whole phenomenon of why such a small nation is compositionally so active is of wide ranging significance Drawing together various strands to emerge from these individual personalities Howell explores the Finnish attitude to new music in both its composition and reception uncovering an enlightened view of the value of creativity from which
