Psychological Testing and Assessment Lewis R. Aiken, 1988 *The Education Index*, 1985 *Gender Differences in Mathematics* Ann M. Gallagher, James C. Kaufman, 2004-12-27 Females consistently score lower than males on standardized tests of mathematics yet no such differences exist in the classroom These differences are not trivial nor are they insignificant

Test scores help determine entrance to college and graduate school and therefore by extension a person's job and future success. If females receive lower test scores then they also receive fewer opportunities. Why does this discrepancy exist? This book presents a series of papers that address these issues by integrating the latest research findings and theories. Authors such as Diane Halpern, Jacquelynne Eccles, Beth Casey, Ronald Nuttal, James Byrnes, and Frank Pajares tackle these questions from a variety of perspectives. Many different branches of psychology are represented, including cognitive, social, personality, self-oriented, and psychobiological. The editors then present an integrative chapter that discusses the ideas presented and other areas that the field should explore.

Psychological Testing Anne Anastasi, 1988. This classic authoritative introduction to psychological testing is widely hailed for its broad coverage and its ability to cover graduate school topics in terms that one with little testing experience can understand. This book familiarizes the reader with the basics of test construction and prepares the reader to effectively evaluate different tests, choose tests for particular purposes, and individual examinees and interpret scores properly.
