Competition Stefan Arora-Jonsson, Nils Brunsson, Raimund Hasse, Katarina Lagerström, 2021-06-30 One of the predominant trends of modern society is the pervasive presence of competition No longer just a function of economic markets or democratic systems competition has become a favoured tool for governing people and organizations from the provision of schooling and elder

care to the way we consume popular culture Yet social scientists have played a surprisingly modest role in analysing its implications as the discussion of competition has largely been confined to its narrow economic meaning This book opens up competition for the study of social scientists Its central message is that while competition seems ubiquitous it should not be taken for granted or be naturalized as an inevitable aspect of human existence Its emergence maintenance and change are based on institutions and organizational efforts and a central challenge for social science is to learn more about these processes and their outcomes With the use of a novel definition of competition more fundamental questions can be addressed than merely whether or not competition works How is competition constructed and by whom Which behaviours result from competition What are its consequences Can competition be removed And how do these factors vary with the object of competition be it money attention status or other scarce and desired objects This book investigates these and more questions in studies of competition among and within schools universities multinational corporations auditors waste disposal firms fashion designers and more

The Holocaust Jeremy Black, 2016-08-14 A compact and cogent academic account of the Holocaust Kirkus Reviews Brilliant and wrenching The Holocaust History and Memory tells the story of the brutal mass slaughter of Jews during World War II and how that genocide has been remembered and misremembered ever since Taking issue with generations of scholars who separate the Holocaust from Germany's military ambitions historian Jeremy M Black demonstrates persuasively that Germany's war on the Allies was entwined with Hitler's war on Jews As more and more territory came under Hitler's control the extermination of Jews became a major war aim particularly in the east where many died and whole Jewish communities were exterminated in mass shootings carried out by the German army and collaborators long before the extermination camps were built Rommel's attack on Egypt was a stepping stone to a larger goal the annihilation of 400 000 Jews living in Palestine After Pearl Harbor Hitler saw America's initial focus on war with Germany rather than Japan as evidence of influential Jewish interests in American policy thus justifying and escalating his war with Jewry through the Final Solution And the German public knew In chilling detail Black unveils compelling evidence that many everyday Germans must have been aware of the genocide around them In the final chapter he incisively explains the various ways that the Holocaust has been remembered downplayed and even dismissed as it slips from horrific experience into collective consciousness and memory Essential concise and highly readable The Holocaust History and Memory bears witness to those forever silenced and ensures that we will never forget their horrifying fate A balanced and precise work that is true to the scholarship comprehensive yet not overwhelming clearly written and beneficial for the expert and informed public alike Jewish Book Council A demanding but important work Choice Reviews **Bills of Union** Aaron

ambitions such as Benjamin Franklin and offered proposals for imperial or continental paper currencies and monetary unions which would help knit together colonial territories throughout North America and even the Caribbean into a cohesive whole during a moment of imperial reform This book brings together these proposals for the first time including several never studied before to show how thinkers and writers on empire currency and finance drew on financial practices precedents and principles from across the British Atlantic to present their own visions of monetary union and the future of empire In doing so it makes an important and original contribution to the wider histories of monetary and financial thought and theory and the roots of American monetary policy and the links between finance empire politics reform and revolution It will be of interest to academics working on the history of finance banking and currency in the British Isles North America and the Caribbean in the eighteenth century as well as those working on the political economy of the British Empire including mercantilism trade warfare and the politics of empire in the decades leading up to the American Revolution **Air Power** Jeremy

scope of eighteenth century warfare historian Jeremy Black takes us far and wide from the battlefields and global maneuvers in North America and Europe to the military machinations and plotting of such Asian powers as China Japan Burma Vietnam and Siam Europeans coined the term strategy only two centuries ago but strategy as a concept has been practiced globally throughout history Taking issue with traditional military historians Black argues persuasively that strategy was as much political as battlefield tactics and that plotting power did not always involve outright warfare but also global considerations of alliance building trade agreements and intimidation This is both an overview of eighteenth century warfare and an interpretation of how war was made a polemical contribution to a debate on the nature of strategy and a contribution to global history Alan Forrest author of Napoleon Life Legacy and Image A Biography A refreshing new look at how meanings behind these terms strategy and strategic culture were understood and employed in the eighteenth century With his vast knowledge and insights of the period he is able to take us on a wide ranging exploration that provides stimulating food for thought for historians of all periods Richard Harding author of The Emergence of Britain's Global Naval Supremacy The War of 1739 1748

Pelevin and Unfreedom Sofya Khagi, 2020-12-15 Sofya Khagi's Pelevin and Unfreedom Poetics Politics Metaphysics is the first book length English language study of Victor Pelevin one of the most significant and popular Russian authors of the post Soviet era The text explores Pelevin's sustained Dostoevskian reflections on the philosophical question of freedom and his complex oeuvre and worldview shaped by the idea that contemporary social conditions pervert that very notion Khagi shows that Pelevin uses provocative and imaginative prose to model different systems of unfreedom vividly illustrating how the present world deploys hyper commodification and technological manipulation to promote human degradation and social deadlock Rather than rehearse Cold War era platitudes about totalitarianism Pelevin holds up a mirror to show how social control now covert yet far more efficient masquerades as freedom and how eagerly we accept even welcome control under the techno consumer system He reflects on how commonplace discursive markers of freedom like the free market are in fact misleading and disempowering Under this comfortably self occluding bondage the subject loses all power of self determination free will and ethical judgment In his work Pelevin highlights the unprecedented subversion of human society by the techno consumer machine Yet Khagi argues however circumscribed and ironically qualified he holds onto the emancipatory potential of ethics and even an emancipatory humanism

Geopolitics and the Quest for Dominance Jeremy Black, 2015-11-25 History and geography delineate the operation of power not only its range but also the capacity to plan and the ability to implement Approaching state strategy and policy from the spatial angle Jeremy Black argues that just as the perception of power is central to issues of power so place and its constraints and relationships is partly a matter of perception not merely map coordinates Geopolitics he maintains is as much about ideas and perception as it is about the actual spatial dimensions of power Black's study ranges widely examining geography and the spatial nature of state power from the 15th century to the present day He considers the rise of British power geopolitics and the age of

Imperialism the Nazis and World War II and the Cold War and he looks at the key theorists of the latter 20th century including Henry Kissinger Francis Fukuyama and Samuel P Huntington Philip Bobbitt Niall Ferguson and others

Geographies of an Imperial Power Jeremy Black,2018-01-06 From explorers tracing rivers to navigators hunting for longitude spatial awareness and the need for empirical understanding were linked to British strategy in the 1700s This strategy in turn aided in the assertion of British power and authority on a global scale In this sweeping consideration of Britain in the 18th century Jeremy Black explores the interconnected roles of power and geography in the creation of a global empire Geography was at the heart of Britain s expansion into India its response to uprisings in Scotland and America and its revolutionary development of railways Geographical dominance was reinforced as newspapers stoked the fires of xenophobia and defined the limits of cosmopolitan Europe as compared to the barbarism beyond Geography provided a system of analysis and classification which gave Britain political cultural and scientific sovereignty Black considers geographical knowledge not just as a tool for creating a shared cultural identity but also as a key mechanism in the formation of one of the most powerful and far reaching empires the world has ever known
