Other Ways Of Knowing Recharting Our Future With Ageless Wisdom:

Other Ways of Knowing John Broomfield,1997-06 Our environment and our civilization are in crisis But the wisdom to chart a new course is available to us from unexpected sources including the sacred traditions of our ancestors From the Polynesian technique of remote viewing to the formative causation theory of Rupert Sheldrake **Other Ways of Knowing** examines perceptions and practices that challenge the narrow perspective of the West **Wild Earth, Wild Soul** Bill Pfeiffer,2013-06-28 Humankind has the capacity and know how to create Earth honoring cultures in a new way for new times Through tapping into ancestral memories taking what s best from the human potential movement and collaborating with present day indigenous peoples we can find our way home Practicing the key ingredients of a lasting culture is an ecstatic way to live This book shows you how Wild Earth, Wild Soul (2nd Edition) Sky Otter,2025-04-29 Imagine a nature based culture so alive and so connected spreading like wildfire This book is the match *Internet Management Issues: A Global Perspective* Haynes, John D.,2001-07-01 It is tempting to think that in the year 2001 our technology is very sophisticated and accordingly it is very tempting to believe that present day computer technology is very advanced begging the question of to what The fact is that we have only just begun to develop computer technology and the recent implementation of the Internet brings us to a special threshold in that development Development stages require very careful and thoughtful management What we do now in this present development stage will be profoundly important for future generations The management of the foundation for the evolution of computer technology is a very special case because it will also become intimately connected with the management of mankind itself not only in groups or collectively but also eventually as a species Nei Kung Kosta Danaos,2002-02-01 Explains the science behind the practice of nei kung the elemental nature of yin and yang energy the two components of ch i and how learning to control the yang energy in our ch i can result in the release of dynamic energy Establishes the existence and understanding of nei kung in the practices of many of the world s ancient cultures Includes a step by step guide to the meditation that forms the basis of the practice of nei kung By Kosta Danaos author of *The Magus of Java* and apprentice to an immortal of the Mo Pai tradition In 1994 Kosta Danaos was accepted as a student by John Chang a Chinese Javanese Taoist in the Mo Pai tradition and a master of nei kung the practice of harnessing and controlling our body s bioenergy or ch i *Nei Kung The Secret Teachings of the Warrior Sages* describes the practice of nei kung and how learning to control our ch i can result in the release of dynamic energy that can be used for healing pyrogenesis telekinesis levitation telepathy and more Danaos suggests that both components of ch i yin and yang energy are fundamental to the earth and to life and were recognized and used in many of the world s ancient cultures Though we have forgotten how to access them these components are in fact elemental parts of us The author explains that we first must open our minds to the fact that the power of ch i is real Next in learning to control our ch i as a whole we must learn to channel our yang energy in productive ways a potential we all possess To help readers understand their capacity to connect with this

inner elemental power the author offers a fascinating blend of teachings that include sound scientific theories explaining much of the magic of nei kung He also offers historical linguistic artistic and literary proof of the presence and understanding of nei kung throughout the ages and a step by step introduction to several types of simple meditation fundamental to directing one's chi With his engaging storytelling and disarming humor his physics based explanations for seemingly mystical phenomena and his reassurances that he's really no different from the rest of us Kosta Danaos shows us that once we remember our capacity to harness our yang energy we can change ourselves and our world Be Nobody Lama Marut, 2014-06-03 With an edgy tone and radical perspective Lama Marut shows that the quest to distinguish ourselves is the true cause of our dissatisfaction and it continually leaves us feeling isolated and alone Drawing from the spiritual truism that only by losing the self can we discover our real potential Be Nobody provides guidance actions and simple meditations to help you lay down the heavy burden of trying to be somebody **Education for Tomorrow** Michael Risku, Letitia Harding, 2013-02-11 Education for Tomorrow A Biocentric Student Focused Approach to Education Reform Michael Risku University of the Incarnate Word USA and Letitia Harding University of the Incarnate Word USA There are many books on the market which discuss indigenous ways of knowing and bemoan western society's seeming lack of interest in anything other than scientific fact based knowledge Equally plentiful are the writings of critical theorists who consider today's public education system to be divisive and manipulated by those in power to ensure that their children have the educational advantages needed to maintain the elite hierarchical status quo Education for Tomorrow is unique in that it brings both of these approaches together first by examining the ways that indigenous people and women of all cultures acquire and pass on knowledge and the deleterious effects that enforced Eurocentric systems have had on that process The authors then turn to public schools to explore the influences both good and bad that today's programs have on the distribution of opportunities afforded to all children in the United States Finally they offer suggestions for a revolutionary education system which highlights the need for all students to have the encouragement and freedom to look critically and rationally at their lives and at their relationship with the natural world This can be achieved by looking back to the pedagogical methods of our indigenous ancestors and forward to a time when all children regardless of ethnic or socio economic heritage are taught in such a way that every aspect of their lives is addressed nurtured valued and enhanced

Original Thinking Glenn Aparicio Parry, 2015-04-14 In Original Thinking Glenn Aparicio Parry delves into the evolution of Western thought to recover the living roots of wisdom that can correct the imbalances in our modern worldview Inspired by groundbreaking dialogues that the author organized between Native American elders and leading edge Western scientists to explore the underlying principles of the cosmos this book offers a radical revisioning of how we think Asking questions such as Is it possible to come up with an original thought What does it mean to be human and How has our thinking created our world today Parry challenges us to consider many of our most basic assumptions To think originally as in thinking new

thoughts that have never been thought or said before is according to Parry largely an illusion So too is the idea of linear human progress Most of us have traveled far from our ancestral lands and in so doing lost connection with place the origin of our consciousness Original Thinking offers a radical revisioning of how we think and what it means to be human It invites us to reintegrate our hearts with our heads and to expand our self imposed narrowing of consciousness In doing so we reconnect with the living original source nature and her interconnected elements and cycles and embrace the communion of old and new rational and intuitive and masculine and feminine Ultimately Parry shows us how to create the tapestry of truly original thinking and to restore thought as a blessing as a whole and complete transmission from Spirit Contents PART ONE ORIGIN Is it possible to come up with an original thought Chapter 1 Original Thought Time and the Unfolding of Consciousness Chapter 2 Looking Backward to Go Forward Chapter 3 Wheels Within Wheels Chapter 4 It s About Time PART TWO DEPARTURE What does it mean to be human Chapter 5 Purpose Potential and Responsibility of Being Human Chapter 6 Rational Thought and Human Identity Chapter 7 Re thinking Language Chapter 8 Beyond Rationality Chapter 9 A Tale of Two Directions PART THREE RETURN How has our thinking created the world today and what is emerging Chapter 10 The Essence of Thought Chapter 11 To Make Thought Whole Again Chapter 12 To Think Without Separation Chapter 13 Re Thinking the Dismal Science Chapter 14 Toward An Original Economics PART FOUR RENEWAL Can education promote the renewal of original thinking Chapter 15 Education as Renewal Chapter 16 Childhood and Education Chapter 17 Higher Education Chapter 18 A New and Ancient Vision Chapter 19 A Vision for Higher Education

The Polymath Waqas Ahmed,2019-01-04 Every human is born with multifarious potential Why then do parents schools and employers insist that we restrict our many talents and interests that we specialise in just one We ve been sold a myth that to specialise is the only way to pursue truth identity or even a livelihood Yet specialisation is nothing but an outdated system that fosters ignorance exploitation and disillusionment and thwarts creativity opportunity and progress Following a series of exchanges with the world s greatest historians futurists philosophers and scientists Waqas Ahmed has weaved together a narrative of history and a vision for the future that seeks to disrupt this prevailing system of unwarranted hyper specialisation In *The Polymath* Waqas shows us that there is another way of thinking and being Through an approach

that is both philosophical and practical he sets out a cognitive journey towards reclaiming your innate polymathic state Going further he proposes nothing less than a cultural revolution in our education and professional structures whereby everyone is encouraged to express themselves in multiple ways and fulfil their many sided potential Not only does this enhance individual fulfilment but in doing so facilitates a conscious and creative society that is both highly motivated and well equipped to address the complexity of 21st century challenges

Teaching Tourism Edelheim, Johan,Joppe, Marion,Flaherty, Joan,2022-02-22 Tourism as an activity is increasingly being criticised for its exploitative and extractive industrial approaches to business Yet it has the power to transform and to regenerate societies cultures and the environment The desire to explore the world around us is deeply embedded in many people s psyche but it comes at a cost to the environment and often to the residents of the visited communities Much of tourism education has been closely linked to preparing students for future professional practice but the challenges and opportunities linked to its consumption require that its future leaders must exhibit very different values and understandings to tackle ever more complex and wicked problems from which tourism cannot dissociate itself This compilation of values based learning experiences can be adapted to suit the needs and disposition of individual instructors and aims not only to engage students in the subject matter but also deepen their understanding of its complexity and interconnectivity and help them become global citizens that lead lives of consequence

Animal Voices Dawn Baumann Brunke,2002-05-01 Animals ranging from mosquitoes to elephants use their own words to guide humanity to a deeper spiritual awakening Contains interviews with 25 professional animal communicators and over 100 different animals and animal spirits Provides a thrilling glimpse of the possibilities of direct animal human dialogue According to Echo an Arabian mare Humans are beings of love who have forgotten what love is and who they are Along with a host of other animal communicators Dawn Baumann Brunke gives animals like Echo a voice a direct line of communication to the human mind Through Animal Voices the animal kingdom delivers a message about deepening our spirituality and reconnecting with the web of life Our earliest ancestors had an ongoing shamanic dialogue with the animal kingdom but this ability has been lost to most in the modern world Brunke provides the techniques to reopen these connections reminding us that when we are open to communication with animals we are open to deeper layers of ourselves The main contributors to this book are actual animals who reveal themselves to be sentient beings with their own thoughts emotions and spiritual reasons for being on the planet How Brunke overcame her initial skepticism and learned to hear their voices is a fascinating story Throughout Animal Voices the author integrates her own reflections with those of the animals she interviews The result is something that will delight animal lovers and force skeptics to reconsider their ideas about the nature of animal consciousness and the possibility of telepathic human animal communication
