## **Our Own Devices The Past And Future Of Body Technology:**

Our Own Devices Edward Tenner,2003 Looks at how the inventions we have created to help protect and ease our lives dramatically affect the human body and human life examining the sometimes surprising ways in which technology has transformed the world

**Our Own Devices** Edward Tenner,2004-06-08 This delightful and instructive history of invention shows why National Public Radio dubbed Tenner the philosopher of everyday technology Looking at how our inventions have impacted our world in ways we never intended or imagined he shows that the things we create have a tendency to bounce back and change us The reclining chair originally designed for brief healthful relaxation has become the very symbol of obesity The helmet invented for military purposes has made possible new sports like mountain biking and rollerblading The typewriter created to make business run more smoothly has resulted in wide spread vision problems which in turn have made people more reliant on another invention eyeglasses As he sheds light on the many ways inventions surprise and renew us Tenner considers where technology will take us in the future and what we can expect from the devices that we no longer seem able to live without

The Empire of Value Andre Orlan,2023-10-31 An argument that conceiving of economic value as a social force makes it possible to develop a new and more powerful theory of market behavior With the advent of the 2007 2008 financial crisis the economics profession itself entered into a crisis of legitimacy from which it has yet to emerge Despite the obviousness of their failures however economists continue to rely on the same methods and to proceed from the same underlying assumptions Andr Orl an challenges the neoclassical paradigm in this book with a new way of thinking about perhaps its most fundamental concept economic value Orl an argues that value is not bound up with labor or utility or any other property that preexists market exchange Economic value he contends is a social force whose vast sphere of influence amounting to a kind of empire extends to every aspect of economic life Markets are based on the identification of value with money and exchange value can only be regarded as a social institution Financial markets for example instead of defining an extrinsic objective value for securities act as a mechanism for arriving at a reference price that will be accepted by all investors What economists must therefore study Orl an urges is the hold that value has over individuals and how it shapes their perceptions and behavior Awarded the prestigious Prix Paul Ricoeur on its original publication in France in 2011 The Empire of Value has been substantially revised and enlarged for this edition with an entirely new section discussing the financial crisis of 2007 2008

*The Handbook of Organizational Culture and Climate* Neal M. Ashkanasy,Celeste P M Wilderom,Mark F. Peterson,2011 The Second Edition provides an overview of current research theory and practice in this expanding field The editorial team and the authors come from diverse professional and geographical backgrounds and provide an unprecedented coverage of topics relating to both culture and climate of modern organizations

**Being and Becoming** Ramsey Elkholy, 2016-05 For the Orang Rimba of Sumatra and tropical foragers in general life in the forest engenders a kind of connectedness that is contingent not only on harmonious relations between people but also between people and the non human environment including those supernatural agencies of the forest that people depend on for their spiritual and emotional wellbeing Exploring this world anthropologist Ramsey Elkholy treats embodied action and perception as the basis of shared experience and shows how various forms of embodied experience constitute the very foundations of human culture In a unique methodological contribution Elkholy adopts a set of body centered approaches that reflect and capture the day to day moment to moment ways in which people engage with the world Being and Becoming is an important contribution to phenomenological anthropology hunter gatherer studies and to Southeast Asian ethnography more generally

**'Extra-Ordinary' Ergonomics** Karl H.E. Kroemer, 2005-08-12 Small and big persons disabled and elderly expectant mothers and children Everyone will fall into one of these categories at least once in their lifetime In fact demographics show that at least two of every five people vary from the norm in height width and weight at any given time Yet customarily designers design for adults of regular size

**The Illusory Boundary** Martin Reuss, Stephen H. Cutcliffe, 2010-08-06 This compelling new book challenges the view that a clear and unwavering boundary exists between nature and technology Rejecting this dichotomy the contributors show how the history of each can be united in a constantly shifting panorama where definitions of nature and technology alter and overlap

**Theses on the Metaphors of Digital-Textual History** Martin Paul Eve, 2024-07-16 Digital spaces are saturated with metaphor we have pages sites mice and windows Yet in the world of digital textuality these metaphors no longer function as we might expect Martin Paul Eve calls attention to the digital textual metaphors that condition our experience of digital space and traces their history as they interact with physical cultures Eve posits that digital textual metaphors move through three life phases Initially they are descriptive Then they encounter a moment of fracture or rupture Finally they go on to have a prescriptive life of their own that conditions future possibilities for our text environments even when the metaphors have become untethered from their original intent Why is whitespace white Was the digital page always a foregone conclusion Over a series of theses Eve addresses these and other questions in order to understand the moments when digital textual metaphors break and to show us how it is that our textual softwares become locked into paradigms that no longer make sense

Contributing to book history literary studies new media studies and material textual studies **Theses on the Metaphors of Digital Textual History** provides generative insights into the metaphors that define our digital worlds

**The Last Great Walk** Wayne Curtis, 2014-09-09 In 1909 Edward Payson Weston walked from New York to San Francisco covering around 40 miles a day and greeted by wildly cheering audiences in every city The New York Times called it the first bona fide walk across the American continent and eagerly chronicled a journey in which Weston was beset by fatigue mosquitos vicious headwinds and brutal heat He was 70 years old In *The Last Great Walk* journalist Wayne Curtis uses the framework of Weston's fascinating and surprising story and investigates exactly what we lost when we turned away from foot travel and what we could potentially regain with America's new embrace of pedestrianism From how our brains and legs evolved to accommodate our ancient traveling needs to the way that American cities have been designed to cater to cars and discourage pedestrians Curtis guides readers through an engaging intelligent exploration of how something as simple as the way we get from one place to another continues to shape our health our environment and even our national identity Not walking he argues may be one of the most radical things humans have ever done

**Against Technology** Steven E. Jones, 2013-01-11 This book addresses the question of what it might mean today to be a Luddite that is to take a stand against technology Steven Jones here explains the history of the Luddites British textile workers who from around 1811 proclaimed themselves followers of Ned Ludd and smashed machinery they saw as threatening their trade *Against Technology* is not a history of the Luddites but a history of an idea how the activities of a group of British workers in Yorkshire and Nottinghamshire came to stand for a global anti technology philosophy and how an anonymous collective movement came to be identified with an individualistic personal conviction Angry textile workers in the early nineteenth century became romantic symbols of a desire for a simple life certainly not the original goal of the actions for which they became famous *Against Technology* is in other words a book about representations about the image and the myth of the Luddites and how that myth was transformed over

time into modern neo Luddism      **Pierre Musso and the Network Society** José Luís Garcia, 2017-01-31 This book is devoted to discussion of the views of Pierre Musso and starts with a central chapter written by Musso entitled Network Ideology from Saint Simonianism to the Internet Pierre Musso is a French philosopher and is one of the most original thinkers in the history of the network society His thought develops a critique of information and communication technologies through their imaginary and social representations and of the information society based on the network metaphor The main question on which Musso has focused his attention is how the network metaphor is one of the most powerful ways of understanding the complex societies in which we live Showing characteristic attention to detail and drawing on the history of ideas political philosophy and sociology Musso traces the genealogy of the network imaginary and points out that it did not emerge with the Internet He shows how its modern roots can be found in Henri de Saint Simon and his disciples engineers and entrepreneurs such as Michel de Chevalier and Barth lemy Prosper Enfantin who developed channel networks railroads and the telegraphic network in France in the nineteenth century In addition to the central piece written by Musso the book includes a general introduction and six commentaries from experts on information technologies and networks It displays a wide range of perspectives from a diverse set of authors in terms of nationalities and universities as well as disciplinary backgrounds
