Edition) Linda Pound, 2019-10-08 An ideal introduction to the pioneers of educational theory for anyone studying childcare, child development or education whether at further or higher education level. The first edition of this book has been a best seller for almost a decade, identified as one of the top ten books for students of child development or early childhood care and education. In this new edition, there is an increased emphasis on both what practice based on particular theories of learning looks like and on criticisms of each theory. A glossary is included in sections highlighting words and concepts particular to the theorist in question. Full colour photographs are used to illustrate some aspects of each theory or approach. How Children Learn looks at a wide range of theorists and practitioners who have influenced current understandings of how children learn and what this means for work with young children. The book summarises the findings and ideas of famous giants such as Montessori and Piaget as well as the more recent ideas of writers and thinkers such as Howard Gardner and Margaret Donaldson. It begins by looking at the work and life of Comenius who is widely described as the father of modern education and looks at the theory behind different approaches to early childhood care and education such as Steiner-Waldorf education, HighScope and Te Whāriki. You will find this book invaluable in giving you a clearer picture of how ideas about children's learning have developed over the past four centuries.
