Innes-Robbins, 2016-10-06 Who is the enemy This is the question most asked in modern warfare gone are the set piece conventional battles of the past Once seen as secondary to more traditional conflicts irregular warfare as modified and refashioned since the 1990s now presents a major challenge to the state and the bureaucratic institutions which have dominated the twentieth century and to the politicians and civil servants who formulate policy Twenty first century conflict is dominated by counterinsurgency operations where the enemy is almost indistinguishable from innocent civilians Battles are gunfights in jungles deserts and streets winning hearts and minds is as important as holding territory From struggles in South Africa the Philippines and Ireland to operations in Iraq Afghanistan and Chechnya this book covers the strategy and doctrine of counterinsurgency and the factors which ensure whether such operations are successful or not Recent ignorance of central principles and the emergence of social media which has shifted the odds in favour of the insurgent have too often resulted in failure leaving governments and their security forces embedded in a hostile population immersed in costly and dangerous nation building **At War with Women** Jennifer Greenburg, 2023-02-15 At War with Women reveals how post 9

11 politics of gender and development have transformed US military power In the mid 2000s the US military used development as a weapon as it revived counterinsurgency in Iraq and Afghanistan The military assembled all female teams to reach households and wage war through development projects in the battle for hearts and minds Despite women technically being banned from ground combat units the all female teams were drawn into combat nonetheless Based on ethnographic fieldwork observing military trainings this book challenges liberal feminist narratives that justified the Afghanistan War in the name of women s rights and celebrated women s integration into combat as a victory for gender equality Jennifer

Greenburg critically interrogates a new imperial feminism and its central role in securing US hegemony Women's incorporation into combat through emotional labor has reinforced gender stereotypes with counterinsurgency framing female soldiers as global ambassadors for women's rights This book provides an analysis of US imperialism that keeps the present in tension with the past clarifying where colonial ideologies of race gender and sexuality have resurfaced and how they are changing today *Rethinking Machine Ethics in the Age of Ubiquitous Technology* White, Jeffrey, Searle, Rick, 2015-05-31 As the utilization of intelligent machines spreads to numerous realms the discourse of machine ethics has also developed and expanded Concerns over machine intelligence and the role of automata in everyday life must be addressed before artificial intelligence and robotic technologies may be fully integrated into human society *Rethinking Machine Ethics in the Age of Ubiquitous Technology* blends forward looking constructive and interdisciplinary visions of ethical ideals aims and applications of machine technology This visionary reference work incorporates ethical conversations in the fields of technology computer science robotics and the medical industry creating a vibrant dialogue between philosophical ideals and the applied sciences With its broad scope of relevant topics this book serves as an excellent tool for policymakers academicians researchers advanced level students technology developers and government officials This timely publication features thoroughly researched articles on the topics of artificial moral agency cyber warfare transhumanism organic neural nets human worker replacement automaticity and global governance security and surveillance military drones and more

Bousquet, 2018-10-09 How perceptual technologies have shaped the history of war from the Renaissance to the present From ubiquitous surveillance to drone strikes that put warheads onto foreheads we live in a world of globalized individualized targeting The perils are great In The Eye of War Antoine Bousquet provides both a sweeping historical overview of military perception technologies and a disquieting lens on a world that is increasingly one in which anything or anyone that can be perceived can be destroyed in which to see is to destroy Arguing that modern day global targeting is dissolving the

conventionally bounded spaces of armed conflict Bousquet shows that over several centuries a logistical order of militarized perception has come into ascendancy bringing perception and annihilation into ever closer alignment The efforts deployed to evade this deadly visibility have correspondingly intensified yielding practices of radical concealment that presage a wholesale disappearance of the customary space of the battlefield Beginning with the Renaissance s fateful discovery of linear perspective The Eye of War discloses the entanglement of the sciences and techniques of perception representation and localization in the modern era amid the perpetual quest for military superiority In a survey that ranges from the telescope aerial photograph and gridded map to radar digital imaging and the geographic information system Bousquet shows how successive technological systems have profoundly shaped the history of warfare and the experience of soldiering A work of grand historical sweep and remarkable analytical power The Eye of War explores the implications of militarized perception for the character of war in the twenty first century and the place of human subjects within its increasingly technical armature
