Starship to Miranda John Cowart, 2010-08-05 Alex Johnson, an editor for the New York Times, boards the spaceship McAuliffe with eleven scientists and technicians bound for a mining base on Miranda, a small moon orbiting Uranus. His assignment is to report on life in deep space. During the voyage he develops a close relationship to Jane Brighton and becomes the personal confidant of Miki Tamura, whose job is to replace the former station supervisor who was removed under suspicious circumstances. Upon their arrival at Miranda, Tamura attempts to take command but the station crew members refuse to follow him. A series of accidents claim the lives of three crew members. The insurgents take the new arrivals prisoners and attempt to kill Alex and Jane. The two escape to Miranda's icy surface in a desperate attempt to take control of the space station and rescue their friends. **Adult content.**

The Advantage Thomas G. Krueger, 2001-05-28 Anton Mueller had just graduated from the University of Munich with a degree in Architecture. Like many youth in Nazi Germany, he was hypnotized by the Fuhrer at the recent Party Day celebrations held in Nuremberg. His goal in life was to aid Hitler in building shrines to the Reich that will last a thousand years. Never could he have conceived that a dying alien had other plans for him.

Faster than Light Robert J. Nemiroff, 2023-09-09 Albert Einstein knew already in the early 1900s when he first published his famous paper about the constancy of the speed of light that not only did this constancy imply that mass contains energy $E = mc^2$ but that faster than light motion could lead to paradoxes, some that seemed to involve backwards time travel. What are these paradoxes? Why is light and its speed relevant? This book will lead you through an obstacle course of conundrums and oddities, building up your understanding of how light's speed creates simple but mind-expanding paradoxes, one conceptual riddle at a time. This is not your average popular science book. This is also not a textbook. This book takes one theme, the universally constant speed of light, and shows how it may appear compromised on scales from the quantum mechanics of the very small to the cosmology of the very large, and the resulting surprising implications can result. **Book Review 1** Imagine embarking on a journey to comprehend the physics of the entire universe with a guide who's not only an expert but makes the concepts digestible and entertaining. Robert J. Nemiroff offers such a journey in *Faster Than Light*, a book that initially describes the speed of light, then touches on subjects as esoteric as time travel using the theory of relativity and speculation on how to send information back in time among other subjects. **blue ink Book Review 2** takes readers on a wild ride through the ins and outs of the speed of light in this mind-bending guide. His primary approach is through a series of humorous thought experiments.

explanations are clear and concise and most of them require only logic to sort out making the book more accessible than similar titles Booklife Book Review 3 A fresh and joyous ride through the mind bending puzzles at the heart of nature s most fundamental speed that remind us that the universe is strange beyond belief Caleb Scharf Author *The Ascent of Information* Book Review 4 Better than a new particle collider Sabine Hossenfelder Author *Existential Physics* *Pink Knight* C J Harvey,2019-03-06 Some ten thousand years ago Earth was visited by beings from another planet in the Barnard s Star system The Babylonians recorded that beings they called the Oannes were amphibious creatures who came to Earth for the welfare of the human race The historian Hellandus describes them as having fishlike features but the head feet and arms of a man They instructed humans in everything a civilized nation should know They built a city beneath Antarctica near the Davis Sea and have lived there peacefully and secretly ever since But now a rogue Dwarf Star called Zarama threatens the very existence of both Earth and the home planet Nazmos Their mythology predicts that a being from another planet will avert disaster Enter Ashley Bonner into this scenario He has been granted special gifts and the Oannes think he may be the predicted one Can Ashley really prevail against a star a third more massive than the sun This is the story of Ashley s development to manhood from age four to seventy and his ultimate sacrifice to save both worlds C J Harvey **The New World on Mars** Robert Zubrin,2024-02-20 Robert Zubrin world renowned space authority and founding president of the Mars Society taps today s newest science and most dogged research to foretell in astounding detail the brave new Martian civilization we will achieve when not if humankind colonizes Mars When Robert Zubrin published his classic book *The Case for Mars* a quarter century ago setting foot on the Red Planet seemed a fantasy Today manned exploration is certain and as Zubrin affirms in *The New World on Mars* so too is colonization From the astronautical engineer venerated by NASA and today s space entrepreneurs here is what we will achieve on Mars and how SpaceX Blue Origin and Virgin Galactic are building fleets of space vehicles to make interplanetary travel as affordable as Old World passage to America We will settle on Mars and with our knowledge of the planet analyzed in depth by Dr Zubrin we will utilize the resources and tackle the challenges that await us What we will we build Populous Martian city states producing air water food power and more Zubrin s Martian economy will pay for necessary imports and generate income from varied enterprises such as real estate sales homes that are airtight and protect against cosmic space radiation with fish farm aquariums positioned overhead letting in sunlight and blocking cosmic rays while providing fascinating views Zubrin even predicts the Red Planet customs social relations and government of the people by the people for the people with inalienable individual rights that will overcome traditional forms of oppression to draw Earth immigrants After all Mars needs talent With all of this in place Zubrin s Red Planet will become a pressure cooker for invention in bioengineering synthetic biology robotics medicine nuclear energy and more benefiting humans on Earth Mars and beyond We can create this magnificent future making life better less fatalistic *The New World on Mars* proves that there is no point killing each other over provinces and limited resources when together
