Adult Survivors of Sexual Abuse Mic Hunter, 1995-04-03 For the practitioner working with adult survivors of sexual abuse this book is a must Offering useful treatment innovations this volume opens with a clear review of dynamic theories that provides a solid introduction to understanding and treating adult survivors of sexual abuse What follows are

three chapters dealing with various sexual problems of adult survivors including sexual dysfunction and sexual compulsivity. The final part of this practical book examines clients with special needs: the very difficult survivor with personality disorders, chemically dependent survivors, male survivors, and partners of survivors. Well balanced and written in an easy to follow style, this volume provides concrete directions for intervention. Practitioners in the fields of clinical psychology, counseling, social work, and mental health, as well as advanced clinical students, will find this an indispensable resource. Imaginary Crimes Lewis Engel, Tom Ferguson, 2004-07. This liberating and important book shows us how to break out of the self-defeating behavior patterns that have been keeping us from attaining our most cherished goals. Many of our most serious psychological problems can be traced to a special form of guilt: the hidden guilt we feel toward our parents or other loved ones. Somewhere back in childhood we came to believe that by achieving independence, happiness, or success we would harm the ones we love. We judged ourselves guilty of imaginary crimes and have been punishing ourselves ever since. This book introduces us to a new approach to psychological healing never before presented in a book for the general public. Many previous readers have found this book a profound step on their road to psychological recovery. Publisher: The Use of Art in Counselling Child and Adult Survivors of Sexual Abuse Maralynn M. Hagood, 2000. Based on clinical work, this book presents a discussion on the use of art in counselling sexually abused children, their families, and sex offenders. Current theoretical models such as the trauma model have been effective in therapy. The author's clinical experience will provide valuable insight to therapists using art therapy techniques. Counselling Adult Survivors of Child Sexual Abuse Christiane Sanderson, 2006-06-15. This updated and expanded edition provides comprehensive coverage of the theory and practice of counselling survivors of child sexual abuse (CSA). In a reasoned and thoughtful approach, this book honestly addresses the complex issues in this important area of work, providing practical strategies, valuable and new insights for counsellors. **Accounts of Innocence** Joseph E. Davis, 2005. Since a new sensitivity and orientation to victims of injustice arose in the 1960s, categories of victimization have proliferated. Large numbers of people are now characterized and characterize themselves as sufferers of psychological injury caused by the actions of others. In contrast with the familiar critiques of victim culture, *Accounts of Innocence* offers a new and empirically rich perspective on the question of why we now place such psychological significance on victimization in people's lives. Focusing on the case of adult survivors of childhood sexual abuse, Joseph E. Davis shows how the idea of innocence shaped the emergence of trauma psychology and continues to inform accounts of the past and hopes for the future in therapy with survivor clients. His findings shed new light on the ongoing debate over recovered memories of abuse. They challenge the notion that victim accounts are an evasion of personal responsibility. And they suggest important ways in which trauma psychology has had unintended and negative consequences for how victims see themselves and for how others relate to them. An important intervention in the study of victimization in our culture, *Accounts of Innocence* will interest scholars of clinical psychology, social work, and sociology, as well as therapists and victim activists. Shattered Innocence Neil

Weiner, Sharon E.
