Literature and the Fine Arts theme is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias

Literature and the fine arts exist as processes and are not the same as culture or cultural processes

The arts are by definition creative acts of human beings

The main elements of art processes are artists audiences and distribution and as historical phenomena they exist within a certain timeframe

Myth and themes like love and death do not fade over time

Changes in the arts come with new knowledge including new materials and with new forms of communication brought about by new audiences

Most important for the context of the arts are power structures and markets

Modernization brought a basic change but up to now still has not led to a global village

The culture of the towns is most important for artists

In addition the world is still divided into those who live in poverty and have no access to the arts and those who are wealthy and sometimes have no interest in the arts

The Theme on Literature and the Fine Arts deals in one volume and covers several topics with many issues such as Artists Audience in the Arts Power Structures Media Communication Forms Markets and Art Processes which are then expanded into multiple

subtopics each as a chapter This volume is aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs

The Theory of Corporate Finance Jean Tirole, 2010-08-26 Magnificent The Economist From the Nobel Prize winning economist a groundbreaking and comprehensive account of corporate finance Recent decades have seen great theoretical and empirical advances in the field of corporate finance Whereas once the subject addressed mainly the financing of corporations equity debt and valuation today it also embraces crucial issues of governance liquidity risk management relationships between banks and corporations and the macroeconomic impact of corporations However this progress has left in its wake a jumbled

array of concepts and models that students are often hard put to make sense of Here one of the world's leading economists offers a lucid unified and comprehensive introduction to modern corporate finance theory Jean Tirole builds his landmark book around a single model using an incentive or contract theory approach Filling a major gap in the field The Theory of Corporate Finance is an indispensable resource for graduate and advanced undergraduate students as well as researchers of corporate finance industrial organization political economy development and macroeconomics Tirole conveys the organizing principles that structure the analysis of today's key management and public policy issues such as the reform of corporate governance and auditing the role of private equity financial markets and takeovers the efficient determination of leverage dividends liquidity and risk management and the design of managerial incentive packages He weaves empirical studies into the book's theoretical analysis And he places the corporation in its broader environment both microeconomic and macroeconomic and examines the two way interaction between the corporate environment and institutions Setting a new milestone in the field The Theory of Corporate Finance will be the authoritative text for years to come [Resources in Education](#) ,1999-10
