

Name: Date: Student Expectations - Objective

Students will understand the relationship between the structure of a cell and its function, and how this relationship changes as the cell matures.

Understanding: cell structure, organelles, cytoplasm, nucleus, cytoskeleton, membrane, vacuole, cell wall.

Three Knowledge Questions (Are these BSCPE concepts covered?)

1. Suppose you were trapped in a desert island without access to fresh water. Which organelle would you use to survive? Explain why or why not.

2. What do you think would happen if you released your hemoglobin with salt water?

Three Reasoning

1. **Cell structure** is a term that describes the internal parts of a cell, such as the **cytoplasm**, **nucleus**, and **mitochondria**, which means that some particles pass through the membrane easily while others do not.

The **Cellular Homeostasis** game is a cell that keeps the internal parts of the cell in balance. The game is designed to help you understand the cell's structure and function. (10)

3. Which particles pass through the membrane?

4. Which particles do not pass through the cell membrane?

5. How does the cell maintain its shape? What do you think about the size of the cell?
