"In the Spotlight" case studies in each chapter provide detailed analyses of problems and show students how to solve these problems step by step. The book also presents example programs and programming exercises that are concise, practical, and designed to assist students' learning.

Highlights of the Fifth Edition

- **New!** A chapter on database programming introduces students to Structured Query Language (SQL) and Python database programming with SQLAlchemy.
- **New!** Numerous chapters have been updated with the dictionary and set comprehensions.
- **Three new GUI programming topics** have been introduced in Chapter 13, including internal and external painting, Listbox widgets, and windows.
- Chapter 3 increases overall **function topics** in greater detail. For instance, a discussion on the **yield** keyword has been added, and an expanded discussion on the **yield from** has been presented. This edition also adopts the standard practice of conditionally executing the main function.
- **String topics** such as f-strings, string tokens, and string immutability have been added and enhanced on.

Available separately for purchase is *MyLab Programming for Starting Out with Python*, the teaching and learning platform that empowers instructors to personalize learning for every student.
