Altshuler,1984 Cited by Business Week as one of 1984 s ten best books on business and economics The Future of the Automobile is the most comprehensive assessment ever conducted of the world s largest industry *Competitiveness and American Society* Steven L. Goldman,1993 The claim that U S industry is in a crisis that it stands at a turning point in its competitiveness with foreign rivals seems on the face of it an objective description of the prevailing state of affairs But what does competitiveness mean when it is used to describe an entire industry an economy a nation What is the relationship between industrial competitiveness and the personal and social value placed on competition What are the social roots of competition that have made it an enduring American value How does the current competitiveness debate serve special interests seeking to preserve or extend their social power The essays presented in *Competitiveness and American Society* all written especially for this volume address these and related questions The answers they offer reveal the political character of the competitiveness debate as well as the complexity and ambiguity of the value judgments with which competitiveness issues are entangled The perspectives taken by the authors range from the austere economic through the political and managerial to the richly sociological The opening essay rejects the possibility let alone the factuality of a national competitiveness crisis the closing essay explicitly identifies the root causes of the crisis as national Other essays look to relationships among culture society and industry in the U S and Japan as factors shaping America s competitiveness crisis and the Western European response to that crisis One essay explores mechanisms that would allow the public to play a constructive role in managerial decision making another explores the complications that have followed from mandating the management of resources in accordance with social values The common denominator of all of the essays is an engagement with the role that social value judgments play in determining the competitiveness of individual firms For some this role is broad and definitive for others it is narrowly circumscribed Taken together the essays in *Competitiveness and American Society* establish the need for wider participation in the debate over the competitiveness of U S industry than has been held so far What is needed is a debate that addresses the quality of American life and the health of

the industrial sector of the economy a debate that opens for public deliberation the changes in personal and social values and institutions that will be required to shape that interdependence
