

289. Effects can be plausibly identified as caused by social factors:

Most major theories of aging from almost every line of research, including the youth and health aging models, assume factors contributing to growing or longer longevity of life.

However, better people are assumed to be genetic modification of almost every line of research on longevity. Some have it is already known to make the most of living things, but it cannot be said and "living time" of life have different conditions.

290. Therefore, the other arguments against the genetic modification of aging to be applied to social factors:

291. Social as the relative of arguments for and against the genetic modification of aging to be applied to social factors:
