**Less Is More** Donna J. Baumbach,Linda L. Miller,2006-06-05 Contains practical advice for updating a school library collection describing why it is important and how to use automation tools to make the job easier

**Time Restored** Jonathan Betts,2011-05-19 This is the story of Rupert T Gould 1890 1948 the polymath and horologist A remarkable man Lt Cmdr Gould made important contributions in an extraordinary range of subject areas throughout his relatively short and dramatically troubled life From antique clocks to scientific mysteries from typewriters to the first systematic study of the Loch Ness Monster Gould studied and published on them all With the title *The Stargazer*

Gould was an early broadcaster on the BBC's Children's Hour when with his encyclopaedic knowledge he became known as The Man Who Knew Everything. Not surprisingly he was also part of that elite group on BBC radio who formed The Brains Trust giving on the spot answers to all manner of wide ranging and difficult questions. With his wide learning and photographic memory Gould awed a national audience becoming one of the era's radio celebrities. During the 1920s Gould restored the complex and highly significant marine timekeepers constructed by John Harrison 1693-1776 and wrote the unsurpassed classic *The Marine Chronometer: its History and Development*. Today he is virtually unknown, his horological contributions scarcely mentioned in Dava Sobel's bestseller *Longitude*. The TV version of *Longitude* in which Jeremy Irons played Rupert Gould did at least introduce Gould's name to a wider public. Gould suffered terrible bouts of depression resulting in a number of nervous breakdowns. These coupled with his obsessive and pedantic nature led to a scandalously reported separation from his wife and cost him his family, his home, his job and his closest friends. In this first ever biography of Rupert Gould, Jonathan Betts, the Royal Observatory Greenwich's Senior Horologist, has given us a compelling account of a talented but flawed individual. Using hitherto unknown personal journals, the family's extensive collection of photographs and the polymath's surviving records and notes, Betts tells the story of how Gould's early life, his naval career and his celebrity status came together as this talented Englishman restored part of Britain's and the world's most important technical heritage: John Harrison's marine timekeepers.

[Encyclopedia of Prophecy](#) Geoffrey Ashe, 2001-06-04 A definitive factual A-Z reference guide offering a global perspective on the role of prophecy in world history, religion, folklore and literature. From at least 1200 B.C. and probably long before, prophets have attempted to see into the future. Most from ancient oracles to modern astrologers, from doomsday sects to telephone psychics have been wrong the majority of the time, says British researcher Geoffrey Ashe. True, foreknowledge is rare, but those rare occurrences are impressive. In this fascinating reference work, the first to encompass the entire 3,000 year span of recorded prophecy, Ashe examines the predictions of both good prophets and bad, including seers like Jacques Cazotte who forecast the Reign of Terror in the French Revolution and Morgan Robertson who described the Titanic disaster 14 years before it happened. He refutes many of the far-fetched claims of Nostradamus and highlights those that foreshadow events after his lifetime. He also examines failed prophecies that have been influential, including the many end of the world forecasts along
