Odour Detection By Mobile Robots:

Odour Detection By Mobile Robots Andrew R Russell, 1999-03-19 Insects are extremely successful creatures thriving in our ever changing and unpredictable world One of the factors behind their success is the use of odour to increase their efficiency when searching for food to help navigate between a source of food and their nest and to enable them to find a mate Mobile robots would have their capabilities greatly enhanced if they could make use of similar techniques This important book describes current research aimed at giving robots the ability to generate detect and discriminate between odours together with the control algorithms using such sensory information Odour Detection by Mobile Robots R. Fuzzy Decision Making In Modeling And Control Joao M Costa Sousa,Uzay Kaymak,2002-12-03 Decision making and control are two fields with distinct methods for solving problems and yet they are closely related This book bridges the gap between decision making and control in the field of fuzzy decisions and fuzzy control and discusses various ways in which fuzzy decision making methods can be applied to systems modeling and control Fuzzy decision making is a powerful paradigm for dealing with human expert knowledge when one is designing fuzzy model based controllers The combination of fuzzy decision making and fuzzy control in this book can lead to novel control schemes that improve the existing controllers in various ways The following applications of fuzzy decision making methods for designing control systems are considered Fuzzy decision making for enhancing fuzzy modeling The values of important

parameters in fuzzy modeling algorithms are selected by using fuzzy decision making Fuzzy decision making for designing signal based fuzzy controllers The controller mappings and the defuzzification steps can be obtained by decision making methods Fuzzy design and performance specifications in model based control Fuzzy constraints and fuzzy goals are used Design of model based controllers combined with fuzzy decision modules Human operator experience is incorporated for the performance specification in model based control The advantages of bringing together fuzzy control and fuzzy decision making are shown with multiple examples from real and simulated control systems
