Oenothera; Cytogenetics and Evolution Ralph Erskine Cleland, 1972 General behavior of oenothera Physical basis of the genetical peculiarities of oenothera Special aspects of oenothera cytogenetics Evolutionary considerations **Biological Invasions in Europe and the Mediterranean Basin** F. di Castri, A.J. Hansen, M. Debussche, 2012-12-06 In view of the massive change in the area of distribution of many world biota across classical biogeographical realms and of the drastic restructuring of the biotic components of numerous ecosystems the Scientific Committee on Problems of the Environment SCOPE decided at its general Assembly in Ottawa Canada in 1982 to launch a project on the Ecology of Biological Invasions Several regional meetings were subsequently organized within the framework of SCOPE in order to single out the peculiarities of the invasions that took place in each region the behaviour of their invasive species and the invasibility of their ecosystems Most noteworthy among such workshops were one in Australia in August 1984 one concerning North America and Hawaii in October 1984 and one dealing with southern Africa in November 1985 A leitmotiv of these workshops was that most of the invasive species to those regions were emanating from Europe and the Mediterranean Basin inadvertently or intentionally introduced by man It was therefore considered as a timely endeavour to organize the next regional meeting in relation to this region The workshop on Biological Invasions in Europe and the Mediterranean Basin was held in Montpellier France 21 to 23 May 1986 thanks to the financial support of SCOPE and of the A W Mellon Foundation and the logistic facilities of the Centre National de la Recherche Scientifique C N R S *Environment and the Experimental Control of Plant Growth* R.J. Downs, 2012-12-02 Environment and the Experimental Control of Plant Growth centers on the general role of environmental factors in plant growth and methods of providing the desired levels and limit of control The book is organized into seven chapters focusing on the various factors in the environment such as temperature light carbon dioxide and water It also describes the controlled environments for plant research This book will help biologists understand what he is buying or constructing in terms of environment variability in plant growth facilities It will also provide some help and guidance to those who have encountered the problem of not obtaining the degree of control they have expected in the units they have in hand
