What Works (and Doesn't) in Reducing Recidivism Edward J. Latessa, Shelley L. Johnson, Deborah Koetzle, 2020-06-08 What Works and Doesn't in Reducing Recidivism offers criminologists and students an evidence based discussion of the latest trends in corrections Experts Latessa Johnson and Koetzle translate the research and findings about what works and doesn't work in reducing recidivism into understandable concepts and terms presenting them in a way that illustrates the value of research to practice Over the last several decades research has clearly shown that rehabilitation efforts can be effective in reducing recidivism among criminal offenders but it is clear that treatment is not a one size fits all approach Offenders vary by gender age crime type and or addictions to name but a few ways and these individual needs must be addressed by providers Finally issues such as leadership quality of staff and evaluation efforts affect the quality and delivery of treatment services While other texts have addressed issues regarding treatment in corrections this text is unique in that it not only discusses the research on what works but also addresses the implementation issues faced as practitioners move from theory to practice as well as the importance of staff leadership and evaluation efforts This book synthesizes the vast research for the

student interested in correctional rehabilitation as well as for the practitioner working with offenders
