Meltdown: Earthquake, Tsunami, and Nuclear Disaster in Fukushima Deirdre Langeland, 2021-02-23 Deirdre Langeland's *Meltdown* explores for middle grade readers the harrowing story of the deadly earthquake tsunami and nuclear meltdown that caused the 2011 Fukushima power plant disaster. On March 11, 2011, the largest earthquake ever measured in Japan occurred off the northeast coast. It triggered a tsunami with a wall of water 128 feet high. The tsunami damaged the nuclear power plant in Fukushima, triggering the nightmare scenario: a nuclear meltdown. For six days, employees at the plant worked to contain the meltdown, and disaster workers scoured the surrounding flooded area for survivors. This book examines the science behind such a massive disaster and looks back at the people who experienced an unprecedented trifecta of destruction. **Rea's Far Eastern Manual ...**, 1923 **User's Manual to the International Annual Reports Collection**, 1988 **Learning and Instruction** National Research Council, Division of Behavioral and Social Sciences and Education, Strategic Education Research Partnership, Panel on Learning and Instruction, 2004-01-04 The Strategic Education Research Partnership SERP is a bold, ambitious plan that proposes a revolutionary program of education research and development. Its purpose is to construct a powerful knowledge base derived from both research and practice that will support the efforts of teachers, school administrators, colleges of education, and policy officials with the ultimate goal of significantly improving student learning. The proposals in this book have the potential to substantially improve the knowledge base that supports teaching and learning by pursuing answers to questions at the core of teaching practices. It calls for the linking of research and development, including instructional programs, assessment tools, teacher education programs, and materials. Best of all, the book provides a solid framework for a program of research and development that will be genuinely useful to classroom teachers. Brown, ABC-Clio Information Services, 1982 **Energy Research Abstracts**, 1986 Parametric Programming for Computer Numerical Control Machine Tools and Touch Probes Mike Lynch, 1997 Until now, parametric programming has been the best kept secret of CNC. This new book demystifies this simple yet sophisticated programming tool in an easy-to-understand tutorial format and presents a comprehensive how-to of parametric programming from a user's point of view. Focusing on three of the most popular versions of parametric programming: Fanuc's custom macro B, Okuma's user task 2, and Fadal's macro, the book describes what parametric programming is, what it can do, and how it does it more efficiently than manual programming. Along with a host of program-simplifying techniques included in the book, you're treated to descriptions of how to write, set up, and run general subprograms, simulate the addition of control options, and integrate higher-level programming capabilities at G-code level. *An Investigation of Labor Flexibility in Cellular Manufacturing Systems* Viviana I. Hartley,2013-04-09 Much has been said and written about Japan s manufacturing prowess Most of the comment comes from people who are merely visitors to the country and can be best classified as observers looking in from the outside Other views come from the Japanese themselves in which the double barrier of culture and language filters out much information that would be of real value to Western industrialists Neither of these limitations apply to John Hartley who has been resident in Japan for the past five years He understands the culture can speak the language and has extensive contacts at the highest level Therefore he is in a unique position to report on the Japanese scene and its activities in advanced manufacturing technology This he has been doing on a regular basis to IFS magazines The Industrial Robot Assembly Automation Sensor Review and The FMS Magazine Most of the material in this book is from John Hartley s pen and represents his most significant contributions on flexible automation in Japan to these journals over the last three years It is augmented with a few other articles written by leading authorities on new technology in Japanese manufacturing industry
