**Diagnosis and Correction of Reading Problems** Darrell Morris, 2013-10-29 This widely adopted text and teacher resource provides a comprehensive approach to assessing and remediating reading difficulties in grades K-6. Darrell Morris presents rich case studies of beginning and older readers struggling with different types of reading problems. He shows how to administer a thorough diagnostic battery and provide instruction tailored to each student's needs. In addition to one-to-one tutoring strategies, small group and whole class applications are discussed. Reproducible tools, book lists, and other user-friendly materials can be photocopied from the book or downloaded and printed in a convenient 8 1/2 x 11 size. New to This Edition: Detailed explanations of how to adapt the techniques for classroom use. The latest research findings pertaining to reading diagnosis. Updated and expanded book lists. Chapter on historical and theoretical foundations. See also the Morris Informal Reading Inventory Preprimer through Grade 8, a complementary assessment tool that yields systematic data on K-8 students' reading abilities.

**Speech and Communication Problems in Psychiatry**, 2013-12-20 This volume represents a painstaking and scholarly introduction to the management of children and adults who have problems of communication related to or in addition to mental disorder. It is a relatively unexplored field having received scant attention until recent years, but the quality of the work included here gives a clear indication that the area should move from the periphery into a mainstream position in the education and practice of speech therapists. Although all students in training receive some teaching in the area of psychiatry, it tends to be limited to a brief consideration of the role of the psychiatrist and clinical psychologist; very rarely the speech therapist. It has been proposed that the education of the speech therapist who intends to enter this difficult but rewarding field should be developed at postgraduate level, and there are strong arguments given in this volume to support the idea. Claims that the field is neglected during initial training are, however, well founded, and this volume should alert those responsible for the education of speech therapists to this deficiency.
