Morality And Architecture Revisited:

Morality and Architecture Revisited David Watkin, 2001-08 When *Morality and Architecture* was first published in 1977 it received passionate praise and equally passionate criticism. An editorial in *Apollo* entitled 'The Time Bomb' claimed that it deserved to become a set book in art school and University art history departments and the *Times Literary Supplement* savaged it as an example of that kind of vindictiveness of which only Christians seem capable. Here for the first time is the story of the book's impact. In writing his groundbreaking polemic David Watkin had taken on the entire modernist establishment tracing it back to Pugin, Viollet le Duc, Corbusier and others who claimed that their chosen style had to be truthful and rational reflecting society's needs. Any critic of this style was considered antisocial and immoral. Only covertly did the giants of the architectural establishment support the author. Watkin gives an overview of what has happened since the book's publication arguing that many of the old fallacies still persist. This return to the attack is a revelation for anyone concerned with architecture's past and future. *Morality and Architecture Revisited* contains the entire text of the book *Morality and Architecture* plus additional material by David Watkin on the controversy that the book created.

Morality and Architecture David Watkin, 1977 *Morality and Architecture* has been described variously as brave, mischievous, brilliant, reactionary and a time bomb. It is undoubtedly controversial, a frank and at times fearlessly polemical exposure of progressivist ideology in architectural criticism.

Morality and Architecture Revisited David Watkin, 2001 When *Morality and Architecture* was first published in 1977 it received passionate praise and equally passionate criticism. An editorial in *Apollo* entitled 'The Time Bomb' claimed that it deserved to become a set book in art school and university art history departments whilst the *Times Literary Supplement* savaged it as an example of that kind of vindictiveness of which only Christians seem capable. In writing his polemic David Watkin, a young don at Peterhouse Cambridge, had the temerity to take on the entire modernist architectural

establishment then at the height of its power and throwing up brutal buildings in the hearts of our communities Watkin showed how such an approach was rooted in a long theoretical tradition stretching back to Pugin Viollet le Duc and Corbusier who claimed that their chosen style had to be truthful and rational reflecting the needs of contemporary society Any critic of such ethical mechanical and populist fallacies was labelled anti social and immoral The book rapidly became a cult text And here it is again with for the first time the story of its impact Only covertly did the giants of the architectural establishment men like Sir John Summerson Sir Denys Lasdun Sir Ove Arup Sir Karl Popper and Sir Ernst Gombrich support the author Watkin goes on to give an overview of what has happened since and summarizes the situation today arguing that many of the old fallacies still persist This return to the attack is a revelation for anyone concerned with the past current and future direction of architecture

The Architecture of Survival Erik Trump, Jake Parcell, 2023-09-05 The Architecture of Survival Setting and Politics in Apocalypse Films offers a compelling exploration of how popular films and TV series from the past two decades use architectural spaces to comment on socio political issues The authors harness varied theoretical perspectives to demonstrate how through set design these works suggest that certain kinds of architecture support human development community and freedom while other kinds separate us from our fellow humans and make democratic politics impossible The clean lines of modernist design serve in films such as Contagion and Ex Machina as a metaphor for the sanitized sterile politics that drive disaster In The Walking Dead apocalypse survivors favor traditional architectural styles when rebuilding society a choice that symbolically affirms their democratic principles The massive walls and super gentrification as seen in Elysium and Army of the Dead divide humanity with those on one side wielding illegitimate power Empty streetscapes intensify loneliness alienation and the destruction of civil norms Smart cities offering a blend of high tech surveillance and big data erode social capital and community in Her and Transcendence The book concludes with a somewhat hopeful glimpse into architecture s potential to mitigate the catastrophic adverse effects of climate change as seen in films like Zootopia

Architecture and Its Ethical Dilemmas Nicholas Ray, 2007-05-07 Ethical issues both practical and philosophical are constantly arising in architectural work This volume relates a broad range of theoretical questions to dilemmas encountered in practice informed by contributions from many different disciplines

Architecture Depends Jeremy Till, 2009 Architects however tend to deny this fearing contingency and preferring to pursue perfection

The Common Good and the Global Emergency T. J. Gorringer, 2011-02-03 Provides a theoretical and political framework of the common good and applies this to the built environment

The Oxford Dictionary of Architecture James Stevens Curl, Susan Wilson, 2015 With over 6 000 entries this is the most authoritative dictionary of architectural history available

Theorizing Tourism Arthur Asa Berger, 2016-09-17 A useful introduction to the critical study of tourism this brief text applies semiotics and cultural theory to deal with some of our most iconic global destinations It offers accessible analyses of 18 famous tourist locations from the Taj Mahal to Red Square and from the Eiffel Tower to Antarctica Written in Berger s

friendly style it allows students to critically examine the political cultural and economic significance these locales and understand their importance to tourism Study questions add more pedagogical value to the highly readable text

Archaeologies of Rules and Regulation Barbara Hausmair, Ben Jervis, Ruth Nugent, Eleanor Williams, 2018-01-29 How can we study the impact of rules on the lives of past people using archaeological evidence To answer this question *Archaeologies of Rules and Regulation* presents case studies drawn from across Europe and the United States Covering areas as diverse as the use of space in a nineteenth century U S Army camp the deposition of waste in medieval towns the experiences of Swedish migrants to North America the relationship between people and animals in Anglo Saxon England these case studies explore the use of archaeological evidence in understanding the relationship between rules lived experience and social identity

Environmental Dilemmas Robert Mugerauer, Lynne Manzo, 2008-01-01 *Environmental Dilemmas* focuses on the ethical problems and dilemmas that emerge in place based professional practices architecture landscape architecture planning engineering and construction management Mugerauer and Manzo connect decision making to major ethical theories principles and rules and professional codes of ethics

Visual Planning and the Picturesque Nikolaus Pevsner, 2010 A previously unpublished work by Nikolaus Pevsner much of which was published as journal articles in the *Architectural Review* in the 1940s and 1950s during Pevsner s term as editor

The Past is the Present; It's the Future Too Christine Ross, 2012-06-28 The term temporality often refers to the traditional mode of the way time is a linear procession of past present and future As philosophers will note this is not always the case Christine Ross builds on current philosophical and theoretical examinations of time and applies them to the field of contemporary art films video installations sculpture and performance works Ross first provides an interdisciplinary overview

of contemporary studies on time focusing on findings in philosophy psychology sociology communications history postcolonial studies and ecology She then illustrates how contemporary artistic practices play around with what we consider linear time Engaging the work of artists such as Guido van der Werve Melik Ohanian Harun Farocki and Stan Douglas allows investigation though the art as opposed to having art taking an ancillary role The Past is the Present It s the Future Too forces the reader to understand the complexities of the significance of temporal development in new artistic practices

Reassessing Nikolaus Pevsner Peter Draper, 2017-07-05 Nikolaus Pevsner was one of the most important and influential art historians of the twentieth century He opened up new areas of enquiry in the history of art revolutionising architectural studies in England and playing a key role in establishing the discipline of design history Through his lectures and broadcasts as well as the remarkable volumes in The Buildings of England series which made him a household name he did much to encourage greater interest in and understanding of art and architecture among a wide public This wide ranging collection of essays based on papers delivered at the conference held at Birkbeck in celebration of the centenary of Pevsner s birth offers the first sustained critical assessment of Pevsner s achievements With contributions by leading international scholars the volume brings together a wealth of new material on Pevsner and his intellectual background both in Germany in the late 1920s and 1930s and in England particularly in the 1940s and 1950s

Utopia, Equity and Ideology in Urban Texts Michael G. Kelly, Mariano Paz, 2023-08-28 Utopia Equity and Ideology in Urban Texts Fair and Unfair Cities explores the complex interrelations of three key critical topics across a diverse range of urban writing Interrogating the links and tensions between aesthetic and political priorities in the representation and imagining of urban life the volume engages with work from a wide variety of linguistic and cultural origins and across a range of textual practices having the urban phenomenon as a common framing concern Individual contributions discussing genre and literary fiction poetic writing documentary and essayistic texts planning manifestos and municipal communications materials serve to demonstrate that the nuanced treatments of urban experience and potential which may be gleaned from across this textual spectrum act as a pragmatic corrective to purely conceptual approaches As such the volume consolidates the emerging dialogue between the fields of utopian studies and literary urban studies understanding these as complementary approaches to the reading of the city and its textual prolongations

Architectural Drawings as Investigating Devices Marianna Charitonidou, 2023-07-10 Architectural Drawings as Investigating Devices explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and 21st centuries It traces their transformations paying special attention to Le Corbusier and Ludwig Mies van der Rohe s preference for perspective representation to the diagrams of Team 10 architects to the critiques of functionalism and the upgrade of the artefactual value of architectural drawings in Aldo Rossi John Hejduk Peter Eisenman and Oswald Mathias Ungers and finally to the

reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture OMA Particular emphasis is placed on the spirit of truth and clarity in modernist architecture the relationship between the individual and the community in post war era architecture the decodification of design process as syntactic analogy and the paradigm of autonomy in the 1970s and 1980s architecture the concern about the dynamic character of urban conditions and the potentialities hidden in architectural programme in the post autonomy era This book is based on extensive archival research in Canada the USA and Europe and will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics Resilience by Design Alexandra Jayeun Lee, 2016-02-24 This book discusses that disasters whether natural or man made are essentially a human phenomenon When a city becomes gridlocked and its resources depleted the collective resilience of those who remain on the ground becomes critical to its immediate survival and recovery The author argues that in order to build resilient futures for our urban environment we need more than the skills of architects engineers and planners Support of local communities and policymakers is also needed The book revisits the recent catastrophic events the earthquakes in Port au Prince and Christchurch and the hurricane in New Orleans and places emphasis on the social cultural and political processes of rebuilding houses facilities and infrastructure that often go unnoticed Understanding the wider context for how a built project comes to be the author argues is a solid indicator of its longevity than by the measure of its material characteristics alone and gives us reasons to question the validity of our intentions as designers of the future This book provides strategies for thinking about assessing and developing ways for place makers from all disciplines to become responsible citizen designers of our cities
