### **Utopia and Education. Studies in Philosophy, Theory of Education and Pedagogy of Asylum** Rafał

Włodarczyk, 2022-01-01 Utopia and Education is an original contribution of the philosophy and theory of education which also enters the fields of disciplines other than pedagogy and uses their approaches and achievements The work is part of utopian studies and complements its discourse with a less marked path of philosophy and theory of education Moreover in the context of pedagogy and education it takes up a number of issues whose significance goes beyond the conventional framework of a single discipline utopia ideology social criticism fundamentalism democracy populism translation transdisciplinarity and knowledge transfer socialisation school as one of the social institutions etc The work not only reconstructs knowledge about specific phenomena relevant to education and pedagogy but also proposes an original solution to educational problems in the form of the concept of asylum pedagogy The approach to these phenomena is well reflected in

the division of the book into two parts The book apart from references to researchers associated with utopian studies addresses ideas of such figures of the humanities and social sciences as Emmanuel Levinas and Erich Fromm their concepts were earlier used by the Author in two monographs Besides there are references to Bronis aw Baczko George Steiner Jacques Derrida Michael Walzer Hannah Arendt Janusz Korczak and Ilan Gur Ze ev Throughout the work the Author attempts to combine the perspectives of critical pedagogy and dialogue finds inspiration in the achievements of the Warsaw School of the History of Ideas and draws on Jewish thought and tradition

**Enchanted by Eternity** William J. Slattery, 2025-01-20 Whether we realize it or not Catholics have been deeply influenced by modernity s failed worldview While we want to live and share our faith with joy we struggle to do so because we unwittingly see the cosmos the human person and society as machines functioning independently of their Creator and of one another If we want to bring the life transforming effects of our faith into the world we must first find and live real Catholicism breaking free of the gravitational pull of modernity s worldview A worldview is the stable all encompassing way in which each of us looks at reality the pair of glasses through which we see the world around us It makes up the grid of givens assumptions and presuppositions through which we view the world It colors what we mean by God universe and human Everyone has a worldview and recognizing our worldview and the worldviews of others is crucial in our search for truth goodness and beauty In *Enchanted by Eternity* Fr William Slattery shows how Catholicism proposes an enchanted and enchanting view of self nature society and the future of each human person created to live in a resurrected body in the new heavens and the new earth As this book reveals rediscovering a truly Catholic worldview will change the way we live and it might even change the world

systems     *Ebony* ,2002-09 EBONY is the flagship magazine of Johnson Publishing Founded in 1945 by John H Johnson it still maintains the highest global circulation of any African American focused magazine     *Historicizing Theory* Peter C. Herman,2012-02-01 Historicizing Theory provides the first serious examination of contemporary theory in relation to the various twentieth century historical and political contexts out of which it emerged Theory a broad category that is often used to encompass theoretical approaches as varied as deconstruction New Historicism and postcolonialism has often been derided as a mere relic of the 1960s In order to move beyond such a simplistic assessment the essays in this volume examine such important figures as Harold Bloom Paul de Man Jacques Derrida Michel Foucault Stephen Greenblatt and Edward Said situating their work in a variety of contexts inside and outside of the 1960s including World War II the Holocaust the Algerian civil war and the canon wars of the 1980s In bringing us face to face with the history of theory Historicizing Theory recuperates history for theory and asks us to confront some of the central issues and problems in literary studies today

*The Philosophy of Susanne Langer* Adrienne Dengerink Chaplin,2019-10-17 This book is a comprehensive study of one of the most insightful and fertile but also most neglected philosophers of the twentieth century Susanne Langer Failure to recognise Langer s seminal philosophical sources has led to frequent misinterpretations and misunderstandings of her unique philosophical thought Beginning with an overview of Langer s life and education this study provides a much needed explanation of how Langer s thinking was shaped by four seminal sources her mentors Henry Sheffer and Alfred North Whitehead and the European philosophers Ernst Cassirer and Ludwig Wittgenstein Langer s ability to unite seemingly disparate fields such logic art and embodied cognition around the notion of symbolic form places aesthetics not at the margins of philosophy but at its very centre By locating Langer s work in the broader context of major developments in twentieth century European and American philosophy Dengerink Chaplin shows how she was often ahead of her time Shedding new light on Langer as an American philosopher whose innovative thought crosses the customary boundaries between analytic and continental philosophy this book confirms why she continues to have relevance today     *An Ethnomusicologist's Last Lecture* Steven Loza,2023-12-07 An Ethnomusicologist s Last Lecture Music and Globalism Philosophy and Religion explores the frustration of many scholars and artists with the content and directions of studies on music which continue to be mostly based on Western thought methods theories and even the modes of communicating ideas and mostly through written published works Steven Loza argues that this pattern has pervaded both philosophy and ethnomusicology fields which should be much more globally based in terms of intellectual analysis culturally diverse points of view and the recognition of multiple ways of thinking and doing He criticizes what he perceives as an intellectual hegemony and biased approach to studying music including the standards to which academics are held responsible the manner in which we and our students have had to study music and the forms by which we are pressured to present our findings many times adapting theories and ideas that have nothing to do with the cultures we are examining through a one way microscope and

often a distorted lens Loza takes the reader through an assortment of historical and contemporary global examples of musical expression creative artists and thinkers looking for ways that we can assess how music both reflects and enacts culturally diverse peoples beliefs thoughts and world views *Routledge Encyclopaedia of Educational Thinkers* Joy A. Palmer Cooper, 2016-05-20 The Routledge Encyclopaedia of Educational Thinkers comprises 128 essays by leading scholars analysing the most important influential innovative and interesting thinkers on education of all time Each of the chronologically arranged entries explores why a particular thinker is significant for those who study education and explores the social historical and political contexts in which the thinker worked Ranging from Confucius and Montessori to Dewey and Edward de Bono the entries form concise accessible summaries of the greatest or most influential educational thinkers of past and present times Each essay includes the following features concise biographical information on the individual an outline of the individual s key achievements and activities an assessment of their impact and influence a list of their major writings suggested further reading Carefully brought together to present a balance of gender and geographical contexts as well as areas of thought and work in the broad field of education this substantial volume provides a unique history and overview of figures who have shaped education and educational thinking throughout the world Combining and building upon two internationally renowned volumes this collection is deliberately broad in scope crossing centuries boundaries and disciplines The Encyclopaedia therefore provides a perfect introduction to the huge range and diversity of educational thought Offering an accessible means of understanding the emergence and development of what is currently seen in the classroom this Encyclopaedia is an invaluable reference guide for all students of education including undergraduates and post graduates in education or teacher training and students of related disciplines **Christian Register and Boston Observer...**, 1886

**Encyclopedia of the Sciences of Learning** Norbert M. Seel, 2011-10-05 Over the past century educational psychologists and researchers have posited many theories to explain how individuals learn i e how they acquire organize and deploy knowledge and skills The 20th century can be considered the century of psychology on learning and related fields of interest such as motivation cognition metacognition etc and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology Beyond folk psychology and its na ve theories of learning psychological learning theories can be grouped into some basic categories such as behaviorist learning theories connectionist learning theories cognitive learning theories constructivist learning theories and social learning theories Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines such as philosophy and epistemology education information science biology and as a result of the emergence of computer technologies especially also in the field of computer sciences and artificial intelligence As a consequence machine learning struck a chord in the 1980s and became an important field of the learning sciences in general

As the learning sciences became more specialized and complex the various fields of interest were widely spread and separated from each other as a consequence even presently there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely The Encyclopedia of the Sciences of Learning provides an up to date broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and knowledge engineering This modern compendium will be an indispensable source of information for scientists educators engineers and technical staff active in all fields of learning More specifically the Encyclopedia provides fast access to the most relevant theoretical terms provides up to date broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies supplies clear and precise explanations of the theoretical terms cross references to related entries and up to date references to important research and publications The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning the entries are written by a distinguished panel of researchers in the various fields of the learning sciences
