Morphosis Connected Isolation Architectural Monographs No 23:

Morphosis ,1993 Postmodern Medievalisms Richard J. Utz,Jesse G. Swan,2005 Studies of texts from the late middle ages to the contemporary moment together they indicate broadly directions both in postmodern studies and studies in medievalism **Visioning Technologies** Graham Cairns,2016-12-08 Visioning Technologies brings together a collection of texts from leading theorists to examine how architecture has been and is reframed and restructured by the visual and theoretical frameworks introduced by different technologies of sight understood to include orthographic projection perspective drawing telescopic devices photography film and computer visualization amongst others Each chapter deals with its own area and historical period of expertise organized sequentially to mark out and analyse the historical evolution of how architecture has been transformed by technologically induced shifts in human perception from the 15th century until today This book underlines the way in which architectural forms and design processes have developed historically in conjunction with the systems of sight we manufacture technologically and suggests this continues today Paradoxically it is premised on the argument that these technological systems tend in their initial formulations to obtain ever greater realism in our visualizations of the physical world **Morphosis** Thom Mayne,1993 With writings by Thom Mayne this monograph illustrates a selection of projects many presented for the first time from this LA based group whose work stands as a response to the context and diversity of the urban environment The book gives an insight into the work of this firm covering the earlier works such as the Venice III houses to the recently completed Crawford house and Salick Healthcare building as well as the Higashi Nara and Chiba projects in Japan *The Edge* Carlos Bernardo Portu,1995 **Folding in Architecture** Greg Lynn,1993 An examination of architecture related to the mathematical concept of folding and catastrophe theory Articles by Peter Eisenman and John Rajchman provide an analysis of the theory while projects by Eisenman Bahram Shirdel and Frank Gehry among others are presented all showing folding theory worked into architectural practice Andreas Papadakis Presents Theory + Experimentation Andreas C. Papadakis,1993 This is not only a source book of an international array of architects and ideas an extravaganza of architectural theory and its realisation but also contains extensive biographies of 35 architects The fracturing of the barriers between theory and reality is revealed as architecture moves from the studio and the realm of theory into street the realm of practice displaying an architecture of experimentation invention and freedom This book forms a rigorous up to the minute view of architectural thinking today and includes inter alia the work of Bernard Tschumi Peter Eisenman Morphosis Coop Himmelblau Daniel Libeskind and Itsuko Hasegawa **Subject Guide to Children's Books in Print 1997** Bowker Editorial Staff,R R Bowker Publishing,1996-09 **El Rio de Vida** Salomon Miguel Valasquez,2003 Vast to Intimate Landscape YanTien Wong,2005 **Bibliographic Guide to Art and Architecture** New York Public Library. Art and Architecture Division,1995 **Art in America** Frank Jewett Mather,Frederic Fairchild Sherman,1994 *Books in Print Supplement* ,1994 Books in Print ,1991 Subject

Guide to Books in Print ,1997 *Morphosis* ,1993 **Lebbeus Woods. Experimental architecture** Massimo Mucci,2022-03-25

Nell'ampia produzione dell'architetto americano Lebbeus Woods 1940-2012 alcuni progetti risalenti alla prima metà degli anni Novanta del secolo scorso sono particolarmente rappresentativi del suo impegno nel ridefinire il ruolo politico dell'architettura nei processi di trasformazione della società. I tre progetti per le città di Zagabria, Sarajevo e L'Avana si distinguono per la ricerca originale e innovativa svolta dall'architetto su concetti quali *freespace*, *free zone*, *heterarchical city* fino ad arrivare a temi progettuali di più ampia portata. Lo studio di questi progetti attraverso l'uso della rappresentazione dell'architettura come strumento di analisi compositiva permette di addentrarsi nelle procedure ideative e grafiche del progettista e di chiarire i punti di contatto e le distanze rispetto alle tendenze architettoniche di quegli anni. I lavori grafici sono qui considerati espressioni di un pensiero teorico critico sull'architettura elaborato attraverso l'uso esplorativo simultaneo del disegno e della scrittura intrecciati tra loro su più livelli semantici in una catena di invenzioni figurative. Questo permette di riconoscere nell'opera di Woods l'uso del disegno come progetto e di capire aspetti non conosciuti del suo linguaggio architettonico approfondendone la genesi compositiva all'interno di un quadro culturale caratterizzato da temi a lui vicini come quello della *experimental architecture*, il Deco, struttivismo, la trasformazione. Sogni di una metropoli Gioia Gattamorta, Luca Rivalta, 1997 **Bibliographie D'histoire de L'art** ,1994 *Morphosis* Peter Cook (Architect, Great Britain), 1989
