**The Bioarchaeology of Space and Place** Gabriel D. Wrobel, 2014-04-16 The Bioarchaeology of Space and Place investigates variations in social identity among the ancient Maya by focusing on individuals and small groups identified archaeologically by their inclusion in specific discrete mortuary contexts or by unusual mortuary treatments Utilizing archaeological biological and taphonomic data from these contexts the studies employ a variety of methodological approaches to reconstruct aspects of individuals life course and mortuary pathways Following this specific mortuary behaviors are discussed in relation to their local or regional cultural setting using relevant archaeological ethnohistoric and or ethnographic data in an effort to interpret their meaning within the broader social political and economic contexts in which they were carried out This volume covers a number of topics that are currently being debated in Maya archaeology including identification and discussion of the role and extent of human sacrifice in Maya culture the use of ancestors for maintaining political power the mortuary use of caves by both elites and non elites ethnic distinctions within urban areas and the extent of movement of people between communities Importantly the papers in this volume attempt to test and move beyond static dichotomous categories that are often employed in mortuary studies in an effort to better understand the complex ways in which the Maya conceptualized and manipulated social identity This type of nuanced case study approach that incorporates historical archaeological and theoretical contextualization is becoming increasingly important in the field of bioarchaeology providing valuable sources of

data where small diverse samples impede populational approaches      **The Gifted Passage** Stephen D. Houston, 2018-01-01 In this thought provoking book preeminent scholar Stephen Houston turns his attention to the crucial role of young males in Classic Maya society drawing on evidence from art writing and material culture The Gifted Passage establishes that adolescent men in Maya art were the subjects and makers of hieroglyphics painted ceramics and murals in works that helped to shape and reflect masculinity in Maya civilization The political volatility of the Classic Maya period gave male adolescents valuable status as potential heirs and many of the most precious surviving ceramics likely celebrated their coming of age rituals The ardent hope was that youths would grow into effective kings and noblemen capable of leadership in battle and service in royal courts Aiming to shift mainstream conceptions of the Maya Houston argues that adolescent men were not simply present in images and texts but central to both      **Houses in a Landscape** Julia A. Hendon, 2010-04-22 An examination of the connections between social identity and social memory using archaeological research on indigenous societies that existed more than one thousand years ago in what is now Honduras      The Comitán Valley Caitlin C. Earley, 2023-07-13 A thousand years ago the Comitán Valley in the Mexican state of Chiapas was the western edge of the Maya world Far from the famous power centers of the Classic period the valley has been neglected even by specialists Here Caitlin C Earley offers the first comprehensive study of sculpture excavated from the area showcasing the sophistication and cultural vigor of a region that has largely been ignored Supported by the rulers of the valley's cities local artists created inventive works that served to construct civic identities In their depictions of warrior kings ballgames rituals and ancestors the artists of Comitán made choices that reflected political and religious goals and distinguished the artistic production of the Comitán Valley from that of other Maya locales After the Maya abandoned their powerful lowland centers those in Comitán were maintained a distinction from which Earley draws new insights concerning the Maya collapse Richly illustrated with never before published photographs of sculptures unearthed from key archaeological sites The Comitán Valley is an illuminating work of art historical recovery and interpretation      **Mesoamerican Osteobiographies** Gabriel D. Wrobel, Andrea Cucina, 2024-07-23 Drawing from a variety of sites throughout Mesoamerica this volume presents a collection of osteobiographies which analyze skeletons and their surroundings alongside historical archaeological ethnographic and other contextual data to better understand the life experiences of individuals      *As the Gods Kill* Andrew K. Scherer, 2025-12-09 An exploration of war violence and sacrifice in precolonial Maya culture and its importance in religious practices *As the Gods Kill* delivers new insights into warfare weaponry violence and human sacrifice among the ancient Maya While attending to the particularity of a singular historical context anthropologist and archaeologist Andrew Scherer also suggests that Maya practices have something to tell us about human propensities toward violence more broadly Focusing on moral frameworks surrounding deliberate injury and killing Scherer examines Maya justifications of violence in particular the obligations to one another to ancestors and to the gods that made violence not only permissible but necessary The analysis

isolates key themes underpinning the morality of violence including justice vengeance payment and costumbre ritual and explores the ethics of violent agents including warriors ritual specialists and the gods Finally Scherer addresses motivations for warfare including the acquisition of spoils tribute captives and slaves An interdisciplinary case study of morality in an ancient society As the Gods Kill synthesizes scholarship on an important dimension of precolonial American culture while taking stock of its implications for the social sciences at large

Feasting with Shellfish in the Southern Ohio Valley Cheryl Claassen, 2010-12-16 In this provocative work Cheryl Claassen challenges long standing notions about hunter gatherer life in the southern Ohio Valley as it unfolded some 8 000 to 3 500 years ago Focusing on freshwater shell mounds scattered along the Tennessee Ohio Green and Harpeth rivers Claassen draws on the latest archaeological research to offer penetrating new insights into the sacred world of Archaic peoples Some of the most striking ideas are that there were no villages in the southern Ohio Valley during the Archaic period that all of the trading and killing were for ritual purposes and that body positioning in graves reflects cause of death primarily Mid twentieth century assessments of the shell mounds saw them as the products of culturally simple societies that cared little about their dead and were concerned only with food More recent interpretations while attributing greater complexity to these peoples have viewed the sites as mere villages and stressed such factors as population growth and climate change in analyzing the way these societies and their practices evolved Claassen however makes a persuasive case that the sites were actually the settings for sacred rituals of burial and renewal and that their large shell accumulations are evidence of feasts associated with those ceremonies She argues that the physical evidence including the location of the sites the largely undisturbed nature of the deposits the high incidence of dog burials the number of tools per body found at the sites and the indications of human sacrifice and violent death not only supports this view but reveals how ritual practices developed over time The seemingly sudden demise of shellfish consumption Claassen contends was not due to overharvesting and environmental change it ended rather because the sacred rituals changed

Feasting with Shellfish in the Southern Ohio Valley is a work bound to stir controversy and debate among scholars of the Archaic period Just as surely it will encourage a new appreciation for the spiritual life of ancient peoples how they thought about the cosmos and the mysterious forces that surrounded them
