Advance Data from Vital & Health Statistics of the National Center for Health Statistics National Center for Health Statistics (U.S.),1976 Neurological and Neuropsychiatric Disorders Affecting Military Personnel and Veterans Mary Jo Pugh, William Walker, Venkatagiri Krishnamurthy, Lisa C. Krishnamurthy, Chen Lin, 2024-03-20 Active military personnel and Veterans of the military face unique neurologic and neuropsychiatric challenges unique to this population compared to the public The military and Veteran population have faced traumatic experiences that lead to both physical and mental consequences Amongst the important challenges unique to this population include traumatic brain injury increased risk of neurological disorders such as dementia and stroke and comorbid neuropsychiatric conditions Unfortunately many of these challenges also have a negative feedback loop such as brain injuries leading to post traumatic stress order which can increase risk of Alzheimer's Dementia Unfortunately there are many gaps in knowledge to understand the unique challenges this population faces There are many opportunities to improve our understanding of these challenges that military personnel and Veterans face The goal of this Research Topic is to shine a light and improve understanding of these challenges We aim to collect knowledge from the global network of researchers working on topics related to Neurological and Neuropsychiatric disorders affecting military personnel and Veterans There are currently many gaps in the diagnosis prevention and treatment of conditions that affect this population disproportionately This collection of work in the Frontiers in Neurology will give authors the opportunity to share with the global scientific community important research findings that address these gaps For this collection we are looking for submissions with topics that specifically address the unique challenges affecting military personnel and Veterans with Neurologic and Neuropsychiatric disorders **The 5-Minute Neurology Consult** D.

Joanne Lynn, Herbert B. Newton, Alexander D. Rae-Grant, 2012 This volume in the 5 Minute Consult series focuses on neurological diseaes and disorders as well as key symptoms signs and tests Dozens of noted authorities provide tightly organized practical guidance Using the famous two page layout and outline format of The 5 Minute Consult Series the book provides instant access to clinically oriented must have information on all disorders of the nervous system Each disease is covered in a consistent easy to follow format basics including signs and symptoms diagnosis treatment medications follow up and miscellaneous considerations including diseases with similar characteristics pregnancy synonyms and ICD coding

Current Management in Child Neurology Bernard L. Maria, 2009 One in ten children seen in primary care practice and 25% of hospitalized children appear with a neurologic complaint The fourth edition of Current Management in Child Neurology provides succinct reviews in the form of superb how to chapters on the most common neurological complaints and pathologic conditions seen in pediatric practice This volume provides clinicians with a state of the art toolbox for diagnosis and treatment of the most commonly presented neurologic disorders and dysfunctions in children including headache seizures and epilepsy neurobehavioral disorders school readiness developmental delay trauma meningitis and encephalitis injury to the preterm and term brains and status epilepticus Chapters new to the 4th edition include information on a range of other conditions such as microcephaly neurodegenerative disorders chromosomal disorders epilepsy in adolescence epileptic encephalopathy pediatric neurotransmitter disorders and tropical child neurology as well as current approaches to neonatal or infantile facial dysmorphism and congenital muscular dystrophies The 4th edition of Current Management in Child Neurology has 111 chapters organized into three sections Clinical Practice Trends The Office Visit and The Hospitalized Child Each of the sections contains carefully selected readings and Web resources for practitioners and patients who seek relevant information on topics addressed in the book s chapters Since the third edition online resources have increased exponentially and Current Management in Child Neurology directs its readers to the most high quality information Federal Register, 2013-08 available **Current Management of Child Neurology** Maria, 2007 Office Visits to Neurologists Susan M.
