Existentialism and Social Work Neil Thompson,2017-09-29 Existentialism and Social Work provides a clearly

expressed and well argued exposition of Sartrean existentialism as a theory base for social work practice It introduces the key concepts and themes of the philosophy and relates them to social welfare theory and practice Existentialism is a valuable means of making sense of many of the complexities contradictions and dilemmas which social work staff encounter The book explores the relationship between theory and practice and examines how existentialism can help to bridge the gap A number of theoretical perspectives are evaluated from an existentialist perspective and links are drawn between Sartre s philosophy and aspects of commonly used theories and methods But this is not simply a theoretical analysis Neil Thompson also explores the use of existentialism as a guide to day to day practice and draws up a set of Principles for Practice The ultimate aim is to present existentialism as a concrete philosophy of praxis

Phenomenology and Existentialism in the Twentieth Century Anna-Teresa Tymieniecka, 2010-06-23 The discussion on the phenomenology of life will continue to be crucial to the general outlook and direction of phenomenological investigations The importance of it is not only the fact that it is an innovation in the philosophical circle but it is also an effort that contributes to the re-reading of the hitherto exaggerated differences between phenomenology and metaphysics What is new and significant about life is that even though it is evident in the flow of the history of philosophy no philosopher has seriously addressed it Not many philosophers have said something in particular about life in serious philosophical reflection The discussion on life by Henri Bergson attests to this and one can hardly point to other deep reflections elsewhere about the subject The advantage here about our area is not only that it has extended the horizon of phenomenological thinking it has also helped to lead phenomenology from the constitutive analysis to a creative impetus that has brought a new point of view to the field hence raising questions about the general philosophical tradition from ancient times This is a reading which my philosophy attempts to investigate about Tymieniecka's thought The emphasis in philosophy till now has been more on reason in its intellectual and pure rational dimension based on the earliest conception of the human person distinguished by rationality

The Existentialist Moment Patrick Baert, 2015-08-20 Choice Outstanding Academic Title for 2015 Jean Paul Sartre is often seen as the quintessential public intellectual but this was not always the case Until the mid 1940s he was not so well known even in France Then suddenly in a very short period of time Sartre became an intellectual celebrity How can we explain this remarkable transformation The Existentialist Moment retraces Sartre's career and provides a compelling new explanation of his meteoric rise to fame Baert takes the reader back to the confusing and traumatic period of the Second World War and its immediate aftermath and shows how the unique political and intellectual landscape in France at this time helped to propel Sartre and existentialist philosophy to the fore The book also explores why from the early 1960s onwards in France and elsewhere the interest in Sartre and existentialism eventually waned The Existentialist Moment ends with a bold new theory for the study of intellectuals and a provocative challenge to the widespread belief that the public intellectual is a species now on the brink of extinction *Existentialism and Its Relevance to the Contemporary System of Education in India: Existentialism and Present Educational Scenario* Rukhsana Akhter, 2014-06 Existentialism represents a protest against the rationalism of traditional philosophy against misleading notions of the bourgeois culture and the dehumanizing values of industrial civilization Since alienation loneliness and self estrangement constitute threats to human personality in the modern world existential thought has viewed as its cardinal concerns a quest for subjective truth a reaction against the negation of Being and a perennial search for freedom From the ancient Greek philosopher Socrates to the twentieth century French philosopher Jean Paul Sartre and other thinkers have dealt with this tragic sense of ontological reality the human situation

within a comic context The book put forward is the beginning of an attempt to revive existentialism by addressing these issues The idea is eventually to present a conception of personhood that is recognizably existentialist or similar to that presented by writers like Kierkegaard Heidegger Jaspers and Sartre in certain fundamental ways but that takes into account the last twenty years of developments in the many different areas of philosophy that directly affect our understanding of what it is to be a person The result will hopefully be a more sophisticated existentialist theory of personhood that can be presented in contemporary terms as a serious challenge to current dogmas in metaphysics and moral theory and be defended against the ascendant naturalistic rationalistic or pragmatist alternatives **From Hegel to Existentialism** Robert C.

Marginalisation and Aggression from Bullying to Genocide Stephen James Minton, 2016-09-26 In this book the author proposes the existence of a continuum of aggressive marginalisation phenomena ranging from the unfortunately commonplace experiences of prejudice discrimination and bullying behaviour through to genocide Attempts made by researchers and practitioners to understand counter and prevent bullying behaviour are reviewed A key finding has been that the success that has been accrued has been limited especially when the case of those who belong to so called minority groups who are often the target of prejudice outside of the school gates is considered it is suggested that future anti bullying actions should meaningfully engage with prejudice as an underlying factor After a critical consideration of the various psychological understandings of aggression aggressive behaviour and marginalisation has been made the author goes on to introduce and assess an eight stage model of physical genocide based primarily on insights from social cognitive psychology and exemplified in the history of the Lakota Cheyenne Campaign 1864 1890 This is followed by a consideration of the cultural genocide levelled against indigenous peoples exemplified in the Sami people in Norway and indigenous peoples of

North America as implemented through the actions of educational systems and educators The book ends with some suggestions being made regarding our potential to address the One and Other mindset that is proposed as underlying the continuum of aggressive marginalisation phenomena through the psychological understandings that we can offer the educational practice that we can provide and in the conscious acts of the affirmation of humanity we can make in our individual and collective choices Stephen James Minton is a lecturer in the psychology of education at the School of Education Trinity College Dublin Ireland He has extensive experience in the fields of anti bullying research and practice and is interested in the histories and psychosocial situations and especially the educational experiences of marginalised people and groups
