## **Memory Fragments Of A Modern History:**

*Memory* Alison Winter, 2012-01-16 Picture your 21st birthday Did you have a party If so do you remember who was there How clear are these memories Should we trust them Such questions have fascinated scientists for hundreds of years and as Alison Winter shows in this book the answers have changed dramatically in just the past century **Memory** Alison Winter, 2012-01-02 This historical study is a compelling demonstration that the science of memory is both a product of and an influence on the culture from which it springs Bookforum Think about a birthday you remember well Now step back and ask how clear are those memories Is there a chance you re remembering incorrectly And what about the details you can no longer recall Are they hidden in your brain or are they gone forever Such questions have fascinated scientists for ages and as Alison Winter shows in *Memory Fragments of a Modern History* the answers have changed dramatically in just the past century Tracing the cultural and scientific history of our understanding of memory Winter explores early metaphors that likened memory to a filing cabinet and later a reel of film Those models were eventually replaced by one in which memory results from an extremely complicated brain wide web of cells and systems that together assemble our pasts Winter introduces us to innovative scientists and sensationalistic seekers and drawing on evidence ranging from scientific papers to diaries to movies explores the way that new understandings from the laboratory have seeped out into psychiatrists offices courtrooms and the culture at large Along the way she investigates the sensational battles over the validity of repressed memories that raged through the 1980s and shows us how changes in technology such as the emergence of recording devices and computers have again and again altered the way we conceptualize and even try to study the ways we remember

Macdonald, 2013-07-18 *Memorylands* is an original and fascinating investigation of the nature of heritage memory and understandings of the past in Europe today It looks at how Europe has become a memoryland littered with material reminders of the past such as museums heritage sites and memorials and at how this memory phenomenon is related to the changing nature of identities especially European national and cosmopolitan In doing so it provides new insights into how memory and the past are being performed and reconfigured in Europe and with what effects Drawing especially though not exclusively on cases concepts and arguments from social and cultural anthropology *Memorylands* argues for a deeper and more nuanced understanding of the cultural assumptions involved in relating to the past It theorizes the various ways in which materializations of identity work and relates these to different forms of identification within Europe The book also

addresses questions of methodology including discussion of historical ethnographic interdisciplinary and innovative methods Through a wide range of case studies from across Europe Sharon Macdonald argues that Europe is home to a much greater range of ways of making the past present than is usually realized and a greater range of forms of historical consciousness At the same time however she seeks to highlight what she calls the European memory complex a repertoire of prevalent patterns in forms of recollection and past presencing The examples in *Memorylands* are drawn from both the margins and metropolitan centres from the relatively small scale and local the national and the avant garde The book looks at pasts that are potentially identity disrupting or difficult as well as those that affirm identities or offer possibilities for transcending national identities or articulating more cosmopolitan futures Topics covered include authenticity temporalities embodiment commodification nostalgia and Ostalgie the musealization of everyday and folk life Holocaust commemoration and tourism narratives of war the heritage of Islam transnationalism and the future of the past *Memorylands* is engagingly written and accessible to general readers as well as offering a new synthesis for advanced researchers in memory and heritage studies It is essential reading for those interested in identities memory material culture Europe tourism and heritage
