

Step #1: Ask a Question

Have you been wondering about something science?

The first step is to ask a question.

Then you ask a science question.

Step #3: Hypothesize

*Now it's time to answer the question. The hypothesis states what you **think** will happen, based on your background knowledge and research.*

Step #2: Conduct Research

Use the Internet to find out what others know about this question.

Just type the question in the search bar, and add "for kids" to get simpler answers.

Step #4: Design a Fair Test

It's time to plan your experiment!

To make sure your experiment will answer the question, you

Step #5: Make observations

A scientist makes observations.

This involves more than just looking. You use scientific tools to measure carefully.

Step #6: Record Results.

As you observe, you must also record your results.

What does this mean?

You must write down everything you've observed.

Step #7: Draw Conclusions

Now you must think about the question again.

Which will evaporate more, water in an open cup or water in a covered cup?

To draw a conclusion, answer based on your results.

Step #8: Share Results

To share your results with others, you must put them in a format that is easy to understand. For example:

- a table
- a graph
- a report
