## Student Exploration: Seasons: Earth, Moon, and Sun

**Background:** Seasons, solar, celestial equator, horizon, latitude, revolution, rotation, celestial equator.

**Prior Knowledge Questions:** (Discuss these with a partner using the Games.)

- Supposed you were stranded on the international airport as everyone is there. How would you know which way is north, or a particular season? I don't know. I would just wait till the sun is either up or down, I would either be looking at the sun and the ground or the horizon.
- How could you determine all your time? if it showed a season.

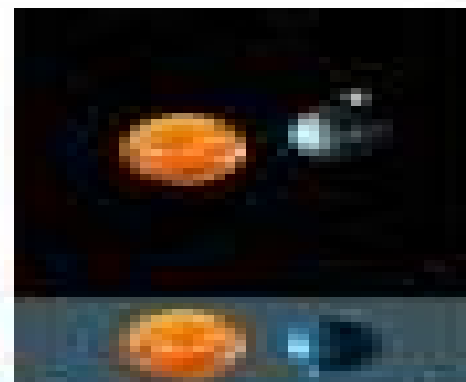

### Warm-Up

Thousands of years ago, people were already looking at the sky. They figured out how seasons and constellations all fit in, and the knowledge passed on to future generations. How much is passed on to you? What time is it now?

In the Seasons: Earth, Moon, and Sun Games, you will learn how you can use the passage of time to determine seasons.

Using the Simulation, spend about 10 minutes with the Seasons: Earth, Moon, and Sun game.

- What happens? The Earth is rotating.
- What does the Earth look like from the ground? The sun rises in the east, sets in the west.
- What does the Earth appear like? What do you see? The whole sky, the horizon, the sun, moon.
- What does the Simulation tell you about the sun? giving the light and warmth, providing us with heat.
