A Contemporary Look at Business Ethics provides a present-day look at business ethics to include the challenges, opportunities, and increased need for ethical leadership in today's and tomorrow's organizations. The book discusses current and future business ethics challenges, issues, and opportunities, which provides the context leaders and their organizations must navigate. The book includes an in-depth look at lessons learned about the causes of unethical behavior by examining a number of real-world examples of ethical scandals from around the world that have taken place over the past few decades. The analysis of the various ethical scandals focuses on concepts like ethical versus unethical leadership, received wisdom, the bottom-line mentality, groupthink, and moral muteness, all of which contribute to the kind of organizational culture and ethical behavior one finds in an organization. The book discusses ethical decision-making in general and the increased role of religion and spirituality in confronting unethical behavior in contemporary organizations. The book also takes an in-depth look at the impact ethical scandals have on employees and more specifically the psychological contract and person-organization ethical fit with the goal of identifying, along with other things, what leaders can do to restore relationships with employees and rebuild the organization's reputation in the eyes of various stakeholders.

Values-Driven Leadership Mary C. Gentile, 2013-08-29 Despite four decades of good faith effort to teach ethics in business schools you will still find today headlines about egregious excess and scandal. It becomes reasonable to ask why these efforts have not been working. Business faculty in ethics courses spend a lot of time teaching theories of ethical reasoning and analyzing those big thorny dilemmas triggering what one professor called ethics fatigue. But what if faculty stopped focusing on ethical analysis and focused on a new curriculum one that builds a conversation across the core curriculum not only in ethics courses and also provides the teaching aids for a new way of thinking about ethics education. This is where Giving Voice to Values (GVV) comes in. The GVV curriculum asks the question: What if I were going to act on my values? What would I say and do? How could I be most effective? This book will help faculty across the business curriculum with examples, strategies, and assistance in applying the GVV approach. In addition to an introductory chapter which explains the rationale and strategy behind GVV, there are twelve individual chapters by faculty from the major business functional areas and from faculty representing different geographic regions. The book is a useful guide for faculty from any business discipline on HOW to use the GVV approach in his or her teaching.
