*Passive Annual Heat Storage* John Hait, 2013-11-17 Still the World's Most Advanced Text on Earth Sheltering and Passive Solar Design Passive Annual Heat Storage PAHS is a method of collecting heat in the summertime by cooling the home naturally storing it in the earth naturally then returning the heat to the home in the winter It includes extensive use of natural heat flow methods and the arrangement of building materials to direct heat from wherever you get it to wherever you want it all without using machinery to make it work With the rising cost of energy all home builders should become familiar with basic PAHS principles The goal of Passive Annual Heat Storage is to provide a method of placing building materials and organizing construction so the comfortable environments produced are continuously pleasant The resulting subterranean home interiors are balanced with the natural environment and are able to extract all of their energy needs from their surroundings without using any commercial energy sources Thus there is no longer any need for using mechanical devices or causing any disruption in global ecosystems Build a home that naturally stays warm in the winter and cool in the summer

**Passive Annual Heat Storage** John Hait, 1983      *The Year-Round Solar Greenhouse* Lindsey Schiller, 2016-10-01 Build your own passive solar greenhouse for year round food production in any climate Fresh local nutrient dense fruits vegetables are hard to find in winter in cold climates Growing warm weather crops like tomatoes bananas avocados and other perennials is nearly impossible using conventional structures The solution for millions of backyard and small scale commercial growers is self heating solar greenhouses The Year round Solar Greenhouse is the one stop guide to designing and building greenhouses that harness and store energy from the sun to create naturally heated lush growing environments even in the depths of winter covering principles of solar greenhouse design and siting glazing material properties and selection controlling heat loss ventilation and construction methods Additionally an in depth section covers sustainable ways of heating the greenhouse without fossil fuels including using thermal mass and storing heat underground with a ground to air heat exchanger Variations include attached solar greenhouses earth sheltered greenhouses plus integrating hydroponics and aquaponics More than a dozen case studies from across North America provide inspiration and demonstrate specific challenges and solutions for growing year round in any climate Grow your own food anytime anywhere using the power of the sun

**Design and Construction of Bioclimatic Wooden Greenhouses, Volume 4** Gian Luca Brunetti, 2022-12-20 This book is the fourth of four dealing with bioclimatic design and construction by focusing on the most basic and polyvalent of modern environmental systems the bioclimatic greenhouse the Swiss army chainsaw of architecture More specifically this fourth volume focuses on architectural integration environmental prediction and how to simulate and structurally size a bioclimatic wooden greenhouse In more general terms it helps us to consider how to design and build the structure of bioclimatic low energy architecture with low environmental impact This multi volume book covers both free standing greenhouses that can naturally heat and cool themselves and lean to greenhouses that support the natural heating and

cooling of buildings this includes both agricultural greenhouses and greenhouses suited to host people As a result it is a trans disciplinary work deriving its areas of concern from a broad range of study areas spanning from environmental to constructional to structural drawing the clarity of the approach from the fact that the topics are presented by a single author with a single voice and a designer s mindset To achieve this the book adopts a composite set of explanatory strategies and communication registers including extensive support by 3D construction drawings and examples and presents not only state of the art solutions but also experimental ones

Passive Annual Heat Storage John N. Hait, 1983      **Poetics of Underground Space** Antonello Boschi, 2021-11-04 This book investigates the relationship architecture has with the underground It provides a broad ranging historical and theoretical survey of and critical reflection on ideas pertaining to the creation and occupation of underground space It overturns the classic dictates of construction on the surface and through numerous examples explores recoveries of existing voids excavations caves quarries grottos and burrows The exploitation of land especially in areas of particular value has given rise to the need to reformulate the usual approach to building If the development of urban sprawl its infrastructure and its networks generates increasingly compromised landscapes what are the possible strategies to transform expand and change the usual relationship between abuse of soil and unused subsoil Psychological philosophical literary and cinematographic legacies of underground architecture are mixed with the compositional typological and constructive expedients to produce a rich diverse and compelling argument for these spaces As such the book will appeal to architecture students scholars and academics as well as those with an interest in literary theory cinema and cultural studies
