**Patients and Agents**, 2012 Sylhet the area of Bangladesh most closely associated with overseas migration has seen an increase in remittances sent home from abroad introducing new inequalities Social change has also been mediated by the global forces of Western biomedicine and orthodox Islam This book examines the effects of these modernizing trends on mental health and on local traditional healing as the new inequalities have exacerbated existing social tensions and led to increased vulnerability to mental illness It is the young women of Sylhet who are most affected The global economy has increased competition for resources and led to marriage being seen as a route to economic advancement Parents prefer to give their daughters in marriage to families that will widen their social contacts and enhance their economic and social standing Accordingly the young wife s outsider status and hence vulnerability to mental illness has increased as it is no longer customary to give daughters in marriage to local kin Yet patients and their families do not work out tensions passively They are active agents in the construction of their own diagnosis The extent to which patients act or are acted upon is an investigation that runs throughout the book

**Biomedicine, Healing and Modernity in Rural Bangladesh** Md. Faruk Shah, 2019-12-02 This book provides an ethnographic account of the ways in which biomedicine as a part of the modernization of healthcare has been localized and established as the culturally dominant medical system in rural Bangladesh Dr Faruk Shah offers an anthropological critique of biomedicine in rural Bangladesh that explains how the existing social inequalities and disparities in healthcare are intensified by the practices undertaken in biomedical health centres through the healthcare bureaucracy and local gendered politics This work of villagers healthcare practices leads to a fascinating analysis of the local healthcare bureaucracy corruption structural violence commodification of health pharmaceutical promotional strategies and gender discrimination in population control Shah argues that biomedicine has already achieved cultural authority and acceptability at almost all levels of the health sector in Bangladesh However in

this system healthcare bureaucracy is shaped by social capital power relations and kin networks and corruption is a central element of daily care practices      Urban Child and Adolescent Mental Health Services Taiwo Afuape, Inga-Britt Krause, 2016-05-05 Urban Child and Adolescent Mental Health Services weaves together different strands of mental health work undertaken in one inner city Child and Adolescent Mental Health Service by professionals working in a range of ways In particular it provides examples of how an urban CAMH service has been responsive to and influenced by local circumstances resources and knowledge The book explores the relationship between professionals and the community context which provides the background to the lives of individual service users and the families they serve and how this relationship is integral to the development of a responsive service The chapters cover a range of settings and approaches addressing the social cultural political and community contexts impacting on children young people and families In this way Urban Child and Adolescent Mental Health Services explores challenges and issues emerging in a responsive approach to child and family work in all community settings whether they be urban suburban or rural Urban Child and Adolescent Mental Health Services is intended for mental health and social care professionals involved in therapeutic social and pastoral work with children young people families and communities The book will be of interest to policy makers mental health and social care professionals health visitors general practitioners nurses and midwives as well as to trainees in these professions including trainee clinical psychologists social workers or psychoanalytic and systemic psychotherapists It will also appeal to those interested in responsive communities and critical approaches to therapeutic interventions in mental health work psychology psychotherapy and counselling      The Movement for Global Mental Health William Sax, Claudia Lang, 2025-10-01 In The Movement for Global Mental Health Critical Views from South and Southeast Asia prominent anthropologists public health physicians and psychiatrists respond sympathetically but critically to the Movement for Global Mental Health MGMH They question some of its fundamental assumptions the idea that mental disorders can clearly be identified that they are primarily of biological origin that the world is currently facing an epidemic of them that the most appropriate treatments for them normally involve psycho pharmaceutical drugs and that local or indigenous therapies are of little interest or importance for treating them The contributors argue that on the contrary defining mental disorders is difficult and culturally variable that social and biographical factors are often important causes of them that the epidemic of mental disorders may be an effect of new ways of measuring them and that the countries of South and Southeast Asia have abundant though non psychiatric resources for dealing with them In short they advocate a thoroughgoing mental health pluralism      *The Palgrave Handbook of Sociocultural Perspectives on Global Mental Health* Ross G. *Asymmetrical Conversations* Harish Naraindas, Johannes Quack, William S. Sax, 2014-05-01 Ideas about health are reinforced by institutions and their corresponding practices such as donning a patient's gown in a hospital or prostrating before a healing shrine Even though we are socialized into regarding such ideologies as natural and unproblematic we sometimes seek to bypass circumvent or even transcend the dominant ideologies of our cultures as they are manifested in the institutions of health care The contributors to this volume describe such contestations and circumventions of health ideologies and the blurring of therapeutic boundaries on the basis of case studies from India the South Asian Diaspora and Europe focusing on relations between body mind and spirit in a variety of situations The result is not always the live and let live medical pluralism that is described in the literature

**Descending with angels** Christian Suhr, 2019-07-28 Over several years Christian Suhr followed Muslim patients being treated for jinn possession and psychosis in a Danish mosque and in a psychiatric hospital Through rich filmic and textual case studies he shows how the bodies and souls of Muslim patients become a battlefield between the moral demands of Islam and the psychiatric institutions of European nation states The book reveals how both psychiatric and Islamic healing work to produce relief from pain and also entail an ethical transformation of the patient and the cultivation of religious and secular values through the experience of pain Creatively exploring the analytic possibilities provided by the use of a camera both text and film show how disruptive ritual techniques are used in healing to destabilise individual perceptions and experiences of agency which allows patients to submit to the invisible powers of psychotropic medicine or God
