Porter, 2017-09-25 The inaugural lecture is a tradition that has been practiced in western universities for centuries These lectures originated in the great universities of continental Europe spread to Great Britain and then to North America The tradition has now been appropriated further by universities around the world and especially of late in majority world countries The inaugural lecture is a form of academic discourse in which the recipient of a suitable academic honor usually the bestowal of a form of professorial appointment offers a public lecture in recognition of the event McMaster Divinity College follows in this academic tradition by attaching public inaugural lectures to the appointment of scholars to professorial positions and in particular to those appointed to endowed and named professorial chairs within the institution

Text and History Jens Bruun Kofoed, 2005-06-30 During the past two or three decades the value of the text of the Hebrew Bible as a testimony to the history of Israel has come under siege As the date of the final form of the text has been pushed later and later often into the Hellenistic era the text has been devalued accordingly what is late is viewed as having less value At the same time the connection between the text and extratextual information particularly from archaeology has been rendered less and less clear by both archaeological investigation itself and an increasing inability to connect text and artifact or to do so compellingly Some of the foremost scholars who have argued that the biblical text contributes little to historical research have come from Copenhagen Now from Copenhagen Jens Bruun Kofoed steps forward to address the methodological issues that must lie behind the use of the biblical text and its validation as a source for historical information In this volume he sets out the methodological stepping stones necessary to an honest use of the biblical text and through discussion of presuppositions underlying various methodologies and by evaluating specific test cases shows among other things that lateness of the extant text by itself is not a charge that reduces the text's value as a source of historical information that taking modern genre research and authorial intent into account opens new vistas for evaluating the historiographical reliability of ancient texts and that a way forward from the current impasse is possible

Claude Simon Alastair B. Duncan, 1994 This study of Claude Simon proposes a reading of Simon's work based on the premise that his novels are as much written adventures as adventures in language Special attention is paid to the major novels of the 1980s *The Georgics* and *The Acacia* Simon's development is set in the context of the intellectual and critical debates in which his novels were written and first read from Jean Ricardou's formalism to post structuralism intertextuality and psychoanalytic theory

Understanding the History of Ancient Israel H. G. M. Williamson, 2007-10-25 In popular presentation some treat the Bible as a reliable source for the history of Israel while others suggest that archaeology has shown that it cannot be trusted at all This volume debates the issue of how such widely divergent views have arisen and will become an essential source of reference for the future
