Ayşem Mert, 2015-04-30 Transnational partnerships have become mainstream across levels and issues of environmental governance following their endorsement by the UN in 2002. Despite apparent success, their desirability as a way of governing human interactions with the planet is questioned. **Social Partnerships and Responsible Business** M. May Seitanidi, Andrew Crane, 2013-12-04 Cross sector partnerships are widely hailed as a critical means for addressing a wide array of social challenges such as climate change, poverty, education, corruption, and health. Amid all the positive rhetoric of cross sector partnerships, though, critical voices point to the limited success of various initiatives in delivering genuine social change and in providing for real citizen participation. This collection critically examines the motivations for processes within and expected and actual outcomes of cross sector partnerships. In opening up new theoretical, methodological, and practical perspectives on cross sector social interactions, this book reimagines partnerships in order to explore the potential to contribute to the social good. A multi-disciplinary perspective on partnerships adds serious value to the debate in a range of fields including management, politics, public management, sociology, development studies, and international relations. Contributors to the volume reflect many of these diverse perspectives, enabling the book to provide an account of partnerships that is theoretically rich and methodologically varied. With critical contributions from leading academics such as Barbara Gray, Ans Kolk, John Selsky, and Sandra Waddock, this book is a comprehensive resource which will increase understanding of this vital issue. Democracy and Public-Private Partnerships in Global Governance M. Bexell, U. Mörtz, 2010-08-04 There has been rapid proliferation of public-private partnerships in areas of human rights, environmental protection, and development in global governance. This book demonstrates how different forms of partnership legitimacy and accountability interact and pinpoints trade-offs between democratic values in partnership operations. **Sustainable Development Goals in the Republic of Korea** Tae Yong Jung, 2018-05-15 This book explores the attempts of South Korea in its efforts to achieve the UN's Sustainable Development Goals (SDGs) by 2030. It addresses 6 of the 17 goals: clean water, affordable and clean energy, decent work and economic growth, sustainable cities and communities, climate action, and partnership, and defines specific national strategies. For each strategy, the contributors define the research indicators they selected, then analyze and examine the extent to which South Korea has met the SDG concerned. They draw these conclusions from national and international reports, government documents, and policy papers on SDGs. South Korea's experience in sustainable development and green programs will contribute to the planning of long-term development strategies for developing countries. Public-private Partnerships for Sustainable Development Philipp H. Pattberg, Frank Biermann, Sander Chan, Ayşem Mert, 2012-01-01 The authors advance our understanding of the role of non-state actors in global governance. Forest People Interfaces Bas Arts, Séverine van Bommel, Mirjam Ros-Tonen, Gerard Verschoor, 2012-05-22 This book aims at both academics and professionals in the field of forest people interfaces It takes the reader on a journey through four major themes that have emerged since the initiation of social forestry in the 1970s non

timber forest products and agroforestry community based natural resource management biocultural diversity and forest governance In so doing the books offers a comprehensive and current review on social issues related to forests that other more specialized publications lack It is also theory rich offering both mainstream and critical perspectives and presents up to date empirical materials Reviewing these four major research themes the main conclusion of the book is that na ve optimism associated with forest people interfaces should be tempered The chapters show that economic development political empowerment and environmental aims are not easily integrated Hence local landscapes and communities are not as makeable as is often assumed Events that take place on other scales might intervene local communities might not implement policies locally and governance practices might empower governments more than communities This all shows that we should go beyond community based ideas and ideals and look at practices on the ground

situated place based and multi scalar approach of political ecology This collection advances our understanding of the role of political economic and environmental concerns in tourism practice It offers readers a political ecology framework from which to address tourism related issues and themes such as development identity politics environmental subjectivities environmental degradation land and resources conflict and indigenous ecologies Finally the collection is bookended by a pair of essays from two of the most distinguished scholars working in the subfield Rosaleen Duffy foreword and James Igoe afterword This collection will be valuable reading for scholars and practitioners alike who share a critical interest in the intersection of tourism politics and the environment Global Environmental Governance Reconsidered Frank

types of sub and non state actors does not imply a weakening of the intergovernmental level On the contrary many transnational climate initiatives use the international climate regime as a point of reference and have adopted various rules and procedures from international agreements Rethinking Authority in Global Climate Governance puts forward this argument and expands upon it using case studies which suggest that the effective operation of transnational climate initiatives strongly relies on the existence of an international regulatory framework created by nation states Thus this book emphasizes the centrality of the intergovernmental process clustered around the United Nations Framework Convention on Climate Change UNFCCC and underscores that multilateral treaty making continues to be more important than many scholars and policy makers suppose This book will be of great interest to students and scholars of global environmental politics climate change and sustainable development
