**Crime and Criminal Justice** Ian Marsh, Gaynor Melville, Keith Morgan, Gareth Norris, John Cochrane, 2011-05-09 Crime and Criminal Justice provides students with a comprehensive and engaging introduction to the study of criminology by taking an interdisciplinary approach to explaining criminal behaviour and criminal justice. The book is divided into two parts which address the two essential bases that form the discipline of criminology. Part One describes, discusses and evaluates a range of theoretical approaches that have offered explanations for crime, drawing upon contributions from the disciplines of sociology, psychology and biology. It then goes on to apply these theories to specific forms of criminality. Part Two offers an accessible but detailed review of the major philosophical aims and sociological theories of punishment and examines the main areas of the contemporary criminal justice system, including the police, the courts and judiciary, prisons and more recent approaches to punishment. Presenting a clear and thorough review of theoretical thinking on crime and of the context and current workings of the criminal justice system, this book provides students with an excellent grounding in the study of criminology.

Smith, 2001-06 Michael Passer and Ronald Smith pooled their 25 years of combined experience in teaching Introduction to Psychology to bring you an innovative new approach to unveiling the science of Psychology. The goal of Psychology Frontiers and Applications is to share with students the excitement the authors have found in the study of behavior and to make the course more exciting for you to teach. To achieve this goal, Drs Passer and Smith present Psychology from a perspective that repeatedly emphasizes the linkages between basic science and applied science. Students discover the connections between theoretical research findings and practical solutions to problems in society. This approach teaches students to think more like psychologists, viewing the world of behavior in a more analytical, sophisticated way which includes considering the multiple factors that result in behavior.
