their own applications of theory hypothesis testing and forms of inquiry **Politics of Anxiety** Emmy Eklundh, Andreja Zevnik, Emmanuel-Pierre Guittet, 2017-04-26 From the threats posed by austerity and the fears around global migration to the unsettled notion of resistance our political world is permeated with anxieties But what does this mean for our everyday lived political experience Do governments provoke or encourage a sense of anxiety as a form of control and power How do citizens react to comply with or resist this sense of anxiety This book interrogates the different faces of anxiety and provides a systematic engagement with its different manifestations It uses different disciplinary approaches and methodologies to study political and social phenomena in order to paint a picture of the impact of anxiety and how it governs and mobilises individuals The key strength of these contributions comes from their theoretically informed analysis of empirical problems Moving beyond the concept of the risk society and the recurrence of cyclical capitalist crises this book challenges the notion of the status quo to consider urges and desires for political change By highlighting that anxiety is different from fear the book examines new implications for the study of political events Emotions and Social Movements Helena Flam, Debra King, 2007-04-11 Most research on social movements has ignored the significance of emotions This edited volume seeks to redress this oversight and introduces new research themes and tools to the field of emotions and social movements Sociologists and political activists around the world will find this volume to be of great interest due to its wide ranging approach and its unique emphasis on the role of emotion in protest dissent and social movements Democracy in the Making Kathleen M. Blee, 2012-03-30 Winner of the 2012 ARNOVA Outstanding Book in Nonprofit and Voluntary Action Research Award 2013 Charles Tilly Award for Best Book from the American Sociological Association Section on Collective Behavior and Social Movements Democracy in the Making offers a marvelous synthesis of sociological acumen and hope Kathleen Blee finds that while social activists often narrow their visions of doable social change they also can learn together and take surprising new directions with unpredictable results A wide range of activists will recognize themselves in this book s wonderfully fine grained portraits of politics at the grassroots Paul Lichterman author of Elusive Togetherness Church Groups Trying to Bridge America s Divisions This book is an enormous breath of fresh air in an area that often recycles concepts and perspectives Blee offers a strikingly original approach to grassroots activism that will substantially reorient research in collective action and social movements Marc W Steinberg Associate Professor of Sociology Smith College With civic engagement commonly understood to be on the decline and traditional bases of community and means of engagement increasingly fractured how do people become involved in collective civic action How do activist groups form What hampers the ability of these groups to invigorate political life and what enables it Kathleen Blee s groundbreaking new study provides a provocative answer the early times matter By following grassroots groups from their very beginnings Blee traces how their sense of possibility shrinks over time as groups develop a shared sense of who they are that forecloses options that were once open At the same time she charts the turning points at which options re open and groups become receptive to change

and reinvention Based on observing more than sixty grassroots groups in Pittsburgh for three years Democracy in the Making is an unprecedented look at how ordinary people come together to change society It gives a close up look at the deliberations of activists on the left and right as they work for animal rights an end to the drug trade in their neighbourhood same sex marriage global peace and more It shows how grassroots activism can provide an alternative to civic disengagement and a forum for envisioning how the world can be transformed At the same time it documents how activist groups become mired in dysfunctional and undemocratic patterns that their members dislike but cannot fix By analyzing the possibilities and pitfalls that face nascent activist organizations Blee reveals how critical early choices are to the success of grassroots activism Vital for scholars and activists alike this practical yet profound study shows us through the examples of both groups that flourish and those that flounder how grassroots activism can better live up to its democratic potential

Protest Politics and the Democratization of South Korea Youngtae Shin, 2014-11-20 This book is about protest politics and social movements led by a group of women the Mothers who were inadvertently drawn into South Korea's democratization movement from the 1970s to the 2000s The Mothers were female family members of political dissidents of varying backgrounds and ages college students political and religious leaders writers and factory workers Women who initially had very little in common developed a bond as the days of their families detentions accumulated and their ordeals continued This led them to form a quasi organization prayer meeting group in the 1970s which eventually developed into permanent Mothers organizations in the mid 1980s The Mothers in this book include both the early and late comers to the movement as the membership has undergone many changes since its inception in the 1970s While the individual Mothers are the primary focus this book explores beyond their individual concerns and activities It discusses various methods the individual Mothers employed to promote their causes and attempts to study how the activities of the organizations founded by the inexperienced Mothers have affected the process of Korea's democratization and how they remain active decades later

Affirmative Advocacy Dara Z. Strolovitch, 2008-09-15 The United States boasts scores of organizations that offer crucial representation for groups that are marginalized in national politics from women to racial minorities to the poor Here in the first systematic study of these organizations Dara Z Strolovitch explores the challenges and opportunities they face in the new millennium as waning legal discrimination coincides with increasing political and economic inequalities within the populations they represent Drawing on rich new data from a survey of 286 organizations and interviews with forty officials Strolovitch finds that groups too often prioritize the interests of their most advantaged members male rather than female racial minorities for example or affluent rather than poor women But Strolovitch also finds that many organizations try to remedy this inequity and she concludes by distilling their best practices into a set of principles that she calls affirmative advocacy a form of representation that aims to overcome the entrenched but often subtle biases against people at the intersection of more than one marginalized group Intelligently combining political theory with sophisticated empirical

methods Affirmative Advocacy will be required reading for students and scholars of American politics
