Patient Centered Prescribing Seeking Concordance In Practice Patient Centered Care:

Patient-Centered Prescribing Jon Dowell, Brian Williams, David Snadden, 2007 Half of all prescribed medicines are used in a sub optimal manner and clinicians struggle to find ways of improving the situation This book offers real life case studies to demonstrate the way the patient centered model combined with other behavioural models can result in a logical approach to prescribing for difficult clients

Patient-Centered Prescribing Jon Dowell, Brian Williams, David Snadden, 2018-04-19 Series Editors Moira Stewart Judith Belle Brown and Thomas R Freeman Half of all prescribed medicines are used in a sub optimal manner and clinicians struggle to find ways of improving the situation There is a move towards greater partnership with patients but concordance shared decision making between patients and healthcare professionals is a growing challenge for the profession This practical book offers numerous real life case studies to demonstrate the way the patient centered model combined with other behavioural models can result in a logical approach to prescribing for difficult clients including non compliant and other challenging patients Patient Centered Prescribing fully considers the very complex nature of the issues at hand ethical questions time restrictions and financial matters to produce a realistic analysis of the difficulties to be overcome in achieving better practice This book is ideal for doctors nurses and pharmacists and postgraduate students of medicine pharmacy and nursing It is also of great interest to medical educators particularly those teaching primary care and communication skills and to everyone involved in developing doctor patient partnerships

Palliative Care Geoff Mitchell, 2016-07-06 Series Editors Moira Stewart Judith Belle Brown and Thomas R Freeman As the population in western cultures ages more people suffer chronic ultimately life limiting diseases and medical professionals need to be equipped to cope with the ever growing pressure of palliative care This book gives guidance on how to approach patients with life limiting illness While the problems most people present to the doctor appear relatively straightforward a whole person approach to understanding the complex interaction between the person their illness and their environment should lead to a more complete consideration of the illness and better health outcomes For issues of palliative care such an approach is essential to identify and meet the many needs of desperately ill people Palliative Care offers a fresh look at the management of patients With international evidence based contributions the book suggests practical and challenging ways to care for the dying It is ideal for all healthcare professionals working in palliative care General Practitioners and medicine and healthcare students

Challenges and Solutions Judith Belle Brown, Tanya Thornton, Moira Stewart, 2017-11-22 The foundation of patient centered care is the patient professional relationship By exploring both the disease and patients unique experience of illness healthcare professionals take into consideration their individual needs as well as their emotional and physical concerns Using narratives to describe experiences of patients and professionals this book reveals the four interactive components of the patient centered clinical method exploring health disease and illness understanding the whole person finding common ground and enhancing the patient doctor relationship The concluding chapters illustrate ways in which all four components

interact with and complement each other and can be used in unison to the immeasurable benefit of both patient and professional. The stimulating narratives are all based on recent developments in the theoretical model of patient centered clinical care. This wide ranging thought provoking text is highly relevant to a wide range of healthcare professionals as well as medical educators and healthcare students. For physicians narratives provide insight and illumination of what it truly means to be patient centered. They also help clinicians to examine in a reflective manner what it means to be a healer. From the Introduction

Patient-Centered Medicine Moira Stewart, Judith Belle Brown, Wayne Weston, Ian R. McWhinney, Carol L. McWilliam, Thomas Freeman, 2013-12-28 This long awaited Third Edition fully illuminates the patient centered model of medicine continuing to provide the foundation for the Patient Centered Care series. It redefines the principles underpinning the patient centered method using four major components clarifying its evolution and consequent development to bring the reader fully up to

Public Health And Health Services Research In Traditional, Complementary And Integrative Health Care: International Perspectives, 2019-05-03 The use and practice of traditional complementary and or integrative medicine TCIM raises significant questions poses many challenges and holds much potential for the broad fields of public health and health services research. This book brings together leading international researchers with backgrounds and expertise across broad multi disciplinary sub fields including health social science biostatistics clinical pharmacology implementation science health geography and health economics. Cultural Factors in Systems Design Robert W. Proctor, Shimon Y. Nof, Yuehwern Yih, 2011-10-25 Cultural factors in both the narrow sense of different national racial and ethnic groups and in the broader sense of different groups of any type play major roles in individual and group decisions. Written by an international interdisciplinary group of experts *Cultural Factors in Systems Design* Decision Making and Action explores innovations in the understanding of how cultural differences influence decision making and action. Reflecting the diverse interests and viewpoints that characterize the current state of decision making and cultural research the chapter authors represent a variety of disciplines and specialize in areas ranging from basic decision processes of individuals to decisions made in teams and large organizations to cultural influences on behavior. Balancing theoretical and practical perspectives the book explores why the best laid plans go awry examining conditions that can yield unanticipated behaviors from complex adaptive sociotechnical systems. It highlights the different ways in which East Asians and Westerners make decisions and

explores how to model and investigate cultural influences in interpersonal interactions social judgment and decision making The book also reviews decision field theory and examines its implications for cross cultural decision making With increasing globalization of organizations and interactions among people from various cultures a better understanding of how cultural factors influence decision making and action is a necessity Much is known about decision processes culture and cognition design of products and interfaces for human interaction with machines and organizational processes however this knowledge is dispersed across several disciplines and research areas Presenting a range of current research and new ideas this volume brings together previously scattered research and explores how to apply it when designing systems that will be used by individuals of varied backgrounds Towards Prescribing Practice John McKinnon,2007-04-04 The variety and number of non medical practitioners identified for prescribing activity is growing rapidly Across the country universities have validated prescribing programmes designed for generic health care practice with a distance learning component Towards Prescribing Practice offers readers a comprehensive guide to the principles and practice of prescribing The subject matter relates to the government content standards for study programmes and takes its cue from recent research in prescribing and patient care in practice This book embraces the perennial core principles of prescribing practice management and leadership Content is organised to facilitate progressive learning with space allocated in each chapter to practice application through discussion and exercises The early inclusion of a section on patient centred planning and concordance enables the reader to assimilate new knowledge within an individualised care approach The final three chapters are written from different clinical perspectives mental health palliative care and emergency care providing assistance to specific areas of prescribing practice

Concordance in Medical Consultations Kristian Pollock,2016-07-06 Learning is most powerful when it is both hard work and fun This usually means that it is interactive and based on experience challenging but at the same time possible This book presents a wide variety of games activities and techniques that any teacher tutor or team leader can use to help others learn Each of the chapters has a short introduction followed by several exercises that are interactive fun and will reinforce learning in knowledge skills and attitudes The tools provided describe not only how to do an exercise but also when with whom what will make it work well what can go wrong and give insights into the impact it might make The authors are experienced in leading teams planning and providing education and the tools are tried and tested in real teaching and learning situations The ideas can be used in and across all disciplines and settings *McWhinney's Textbook of Family Medicine* ,2016-02-05 McWhinney s Textbook of Family Medicine is one of the seminal texts in the field defining the principles and practices of family medicine as a distinct field of practice The fourth edition presents new information on stewardship of resources patient information and data delivery of care in the home and consultation and referral as well as six new clinical chapters of common problems in family medicine **Practical Prescribing for Medical Students** Helen Bradbury,Barry Strickland Hodge,2013-11-08 Learning to prescribe is an essential part of medical training Due to various
