Seventy Years of Farm Tractors 1930-2000 Brian Bell,2020-02-20 By the end of the twentieth century there were some half million tractors on British farms more machines than people to drive them Brian Bell s encyclopaedic book traces the evolution of the farm tractor from the days of starting handle and pan seat to current 4 wheel drive machines with air conditioned cabs and computer management systems He deals in particular with developments of the classic period from the 1950s to the 1990s The book is arranged alphabetically by manufacturer from Allis Chalmers to Zetor one hundred marques in total These are all machines to be found on British farms irrespective of their country of manufacture Brian runs concisely through the histories of the companies and their major models illustrated with a wealth of photographs and extracts from sales literature He adds some special features on items such as hydraulic systems and cold starting aids He includes a glossary and full index This book replaces the author s earlier successful Fifty Years of Farm Tractors Many of the photographs are new and the text has been brought up to date to include developments of the early twenty first century

Farm Machinery Brian Bell,2010-02-12 Farm Machinery is the standard book on the current theory and practice of farm mechanisation for students and farmers First published in 1979 this new sixth edition incorporates much new text together with 280 new colour photographs illustrating the steady flow of developments in farm mechanisation that have taken place over the past decade Recent advances in computer technology and satellite field mapping are included and new content enriches the earlier material dealing with the working principles and operation of the vast array of the somewhat less sophisticated farm tractors and machines still in use on British farms There are chapters on tractors cultivation and drilling equipment crop care and harvest machinery Further chapters deal with farmyard and estate maintenance equipment mechanical handlers dairy equipment irrigation farm power and the farm workshop References are made to the UK Health

Safety at Work Act and other safety regulations These summarise their main requirements but they should only be taken as a guide Brian Bell has had a long involvement with farm machinery that started with an apprenticeship in a tractor dealership After a teaching career on farm machinery at Otley College in Suffolk he retired as Vice Principal in 1993 when he was awarded the MBE for services to agriculture Brian Bell has written a number of books and made seventeen DVDs on modern and vintage tractors and machinery
