

An historic expansion of Miami-Dade's transit system won't be cheap

DP= Development cost YOP= Yearly operating cost

Miami-Dade leaders are promising to implement the new "SMART" plan for expanding rail lines well into the suburbs. A new study looks at potential costs for the expansion in six corridors throughout the county. County officials say they're confident they can build and operate the new system for less. The costs listed include construction, land acquisition and other expenses tied to development.

County leaders want Washington and Florida to cover significant chunks of the construction costs, and hope federal and state grants could cover well more than half of the costs to build the lines. The study assumed rail lines for each of the six corridors. But it also included an alternative bus-rapid-transit line for the Kendall route, which typically uses express buses picking up passengers at rail-like stations.
