Mostly Plants Tracy Pollan, Dana Pollan, Lori Pollan, Corky Pollan, 2019-04-16 New York Times and USA Today Bestseller Eat food not too much mostly plants With these seven words Michael Pollan brother of Lori Dana and Tracy Pollan and son of Corky started a national conversation about how to eat for optimal health Over a decade later the idea of eating mostly plants has become ubiquitous But what does choosing mostly plants look like in real life For the Pollans it means eating more of the things that nourish us and less of the things that don't It means cutting down on the amount of animal protein we consume rather than eliminating it completely and focusing on vegetables as the building blocks of our meals This approach to eating also known as a flexitarian lifestyle allows for flavor and pleasure as well as nutrition and sustainability In *Mostly Plants* readers will find inventive and unexpected ways to focus on cooking with vegetables dishes such as Ratatouille Gratin with Chicken or Vegetarian Sausage Crispy Kale and Potato Hash with Fried Eggs Linguine with Spinach and Golden Garlic Breadcrumbs and Roasted Tomato Soup with Gruyere Chickpea Croutons Like any family the Pollans each have different needs and priorities two are vegetarian several are cooking for a crowd every night In *Mostly Plants* readers will find recipes that satisfy all of these dietary needs and can also be made vegan And the best part many of these dishes can be on the table in 35 minutes or less With skillet to oven recipes sheet pan suppers one pot meals and more this is real cooking for real life meals that are wholesome flavorful and mostly plant based

Cooked Michael Pollan, 2013-04-23 Michael Pollan the bestselling author of *The Omnivore's Dilemma* *Food Rules* and *How to Change Your Mind* explores the previously uncharted territory of his own kitchen in *Cooked* *Cooked* is now a Netflix docuseries based on the book that focuses on the four kinds of transformations that occur in cooking Directed by Oscar winning filmmaker Alex Gibney and starring Michael Pollan *Cooked* teases out the links between science culture and the flavors we love In *Cooked* Pollan discovers the enduring power of the four classical elements fire water air and earth to transform the stuff of nature into delicious things to eat and drink Apprenticing himself to a succession of culinary masters Pollan learns how to grill with fire cook with liquid bake bread and ferment everything from cheese to beer Each section of *Cooked* tracks Pollan's effort to master a single classic recipe using one of the four elements A North Carolina barbecue pit master tutors him in the primal magic of fire a Chez Panisse trained cook schools him in the art of braising a celebrated baker teaches him how air

transforms grain and water into a fragrant loaf of bread and finally several mad genius fermentos a tribe that includes brewers cheese makers and all kinds of picklers reveal how fungi and bacteria can perform the most amazing alchemies of all The reader learns alongside Pollan but the lessons move beyond the practical to become an investigation of how cooking involves us in a web of social and ecological relationships Cooking above all connects us The effects of not cooking are similarly far reaching Relying upon corporations to process our food means we consume large quantities of fat sugar and salt disrupt an essential link to the natural world and weaken our relationships with family and friends In fact Cooked argues taking back control of cooking may be the single most important step anyone can take to help make the American food system healthier and more sustainable Reclaiming cooking as an act of enjoyment and self reliance learning to perform the magic of these everyday transformations opens the door to a more nourishing life

The Omnivore's Dilemma Michael Pollan, 2007-08-28 Outstanding a wide ranging invitation to think through the moral ramifications of our eating habits The New Yorker One of the New York Times Book Review s Ten Best Books of the Year and Winner of the James Beard Award Author of This is Your Mind on Plants How to Change Your Mind and the 1 New York Times Bestseller In Defense of Food and Food Rules What should we have for dinner Ten years ago Michael Pollan confronted us with this seemingly simple question and with The Omnivore s Dilemma his brilliant and eye opening exploration of our food choices demonstrated that how we answer it today may determine not only our health but our survival as a species In the years since Pollan s revolutionary examination has changed the way Americans think about food Bringing wide attention to the little known but vitally important dimensions of food and agriculture in America Pollan launched a national conversation about what we eat and the profound consequences that even the simplest everyday food choices have on both ourselves and the natural world Ten years later The Omnivore s Dilemma continues to transform the way Americans think about the politics perils and pleasures of eating

In the Age of the Anthropocene, an era characterized by human-caused climate disaster, catastrophes and dystopias loom. The Anthropocene Cookbook takes our planetary state of emergency as an opportunity to seize the moment to imagine constructive change and new ideas. How can we survive in an age of constant environmental crises? How can we thrive? The Anthropocene Cookbook answers these questions by presenting a series of investigative art and design projects that explore how art, food, and creative thinking can prepare us for future catastrophes.

This cookbook of ideas rethinks our eating habits and traditions challenges our food taboos and proposes new recipes for humanity's survival. They imagine modifying the human body to digest cellulose turning plastic into food tasting smog extracting spices and medicines from sewage and growing meat in the lab. The projects are diverse in their creative approaches and their agendas multilayered multifaceted hybrid and cross pollinated.
