Step #2: Conduct Research

Use the Internet to find out what others know about this question.

Just type the question in the search bar, and add "for kids" to get simpler answers.

This involves more than just looking. You use scientific tools to measure carefully.

Step #6: Record Results.

As you observe, you must also record your results.

What does this mean?

You must write down everything you've observed.

Step #7: Draw Conclusions

Now you must think about the question again.

Which will evaporate more, water in an open cup or water in a covered cup?

To draw a conclusion, answer based on your results.
