Micro Hydro Design Manual Adam Harvey:

Micro-hydro Design Manual Adam Harvey, Andy Brown, Priyantha Hettiarachi, Allen Inversin, 1993-01 Micro Hydro Design Manual has grown from Intermediate Technology's field experiences with micro hydro installations and covers operation and maintenance commissioning electrical power induction generators electronic controllers management and energy surveys There is an increasing need in many countries for power supplies to rural areas partly to support industries and partly to provide illumination at night Government authorities are faced with the very high costs of extending electricity grids Often micro hydro provides an economic alternative to the grid This is because independent micro hydro schemes save on the cost of grid transmission lines and because grid extension schemes often have very expensive equipment and staff costs In contrast micro hydro schemes can be designed and built by local staff and smaller organizations following less strict regulations and using off the shelf components or locally made machinery

Planning and Installing Micro-Hydro Systems Chris Elliott, 2014-04-16 An essential addition to the Earthscan Planning Installing series Planning and Installing Micro Hydro Systems provides vital diagrams pictures and tables detailing the planning and installing of a micro hydro system including information on the maintenance and economics once an installation is running The book covers subjects such as measuring head and flow ecological impacts scheme layouts practical advice calculations and turbine choice Archimedes screws are also covered in detail as well as the main conventional choices relevant to small sites Micro hydro refers to hydropower systems with a power rating of 100kW or less A 100kW system will produce 100 standard units of electricity in one hour These systems have been popular in some sparsely populated or mountainous countries for a number of years but now new technology less stringent regulation of grid connected generators and standardised turbine designs are encouraging more widespread interest in micro hydro in the developed world The renewable energy sector is growing at a remarkable rate and whilst much attention has so far focused on solar and wind technologies Europe and elsewhere have great potential for generating power from small scale hydroelectric installations This book is aimed at site owners designers and consultants who are looking to develop schemes in the micro hydro scale 5 to 100kW although the concepts are

applicable to smaller and larger schemes **Clean Energy Choices** ,2000 **Making Better Buildings** Chris Magwood,Jen Feigin,2014-03-25 Sustainable building from the ground up the pros and cons of the latest green and natural materials and technologies **Energy-Wise Landscape Design** Sue Reed,2010-04-01 An inspiring instructional handbook for transforming idealism into social change The pursuit of freedom and justice is a timeless one but new activists may not know where to begin while more experienced ones often become jaded or fatigued The task of constructing a new society free from oppression and inequality can be overwhelming Tools for facilitating motivation engagement and communication can mean the difference between failure and success for activists and social movements Educating for Action collects the voices of activists whose combined experience in confronting injustice has generated a wealth of key insights for creating social change This practical guide explores such topics as Community activism and direct democracy Conflict negotiation communication and rhetoric Law the educational system and lifestyle activism Social media skills conference planning and online organizing Written in an inspirational tone Educating for Action consciously straddles the line between street activism and classroom instruction Bridging the gap between these two worlds makes for an engaging and instructive manual for social justice helping students teachers and larger activist communities turn their idealism into action Jason Del Gandio is a scholar activist and assistant professor of rhetoric and public advocacy at Temple University He is the author of Rhetoric for Radicals A Handbook for 21st Century Activists Anthony J Nocella II is a scholar activist and senior fellow of the Dispute Resolution Institute at the Hamline Law School He is a long time anti racism youth justice prison abolition hip hop animal disability and Earth liberation activist and has published over fifty scholarly articles and book chapters and sixteen books
