Texas Rangers, Ranchers, and Realtors Thomas O. McDonald, 2021-03-25 A native Georgian James Hughes Callahan 1812 1856 migrated to Texas to serve in the Texas Revolution in exchange for land In Seguin Texas where he settled he met and married a divorcee Sarah Medissa Day 1822 1856 The lives of these two Texas pioneers and their extended family would become so entwined in the events and experiences of the nascent nation and state that their story represents a social history of nineteenth century Texas From his arrival as a sergeant with the Georgia Battalion through the ill fated 1855 expedition that bears his name to his shooting death in a feud with a neighbor Callahan was a soldier a Texas Ranger a rancher and a land developer at every turn making his mark on the evolving Guadalupe River Basin Separately Sarah's family's journey reflected the experience of many immigrants to Texas after its war of independence Thomas O McDonald traces the pair's respective paths to their meeting then follows as together they contend with conflict troublesome social mores the emergence of new industries and the taming of the land along the way helping to shape the Texas culture we know today With a sharp eye for character and detail and with a wealth of material at his command author Thomas O McDonald tells a story as crackling with life as it is

steeped in scholarly research In these pages the lives of the Callahan and Day families become a canvas on which the history of Texas from revolution frontier defense and Indian wars to Anglo settlement and emerging legal and social systems dramatically inexorably unfolds Riparian Areas of the Southwestern United States Peter F. Ffolliott, Leonard F. DeBano, 2003-07-28 The demand for water resulting from massive population and economic growth in the southwestern U S overwhelmed traditional uses of riparian areas As a consequence many of these uniquely structured ecosystems have been altered or destroyed Within recent years people have become increasingly aware of the many uses and benefits of riparian zones a The Indian in American Southern Literature Melanie Benson Taylor, 2020-07-16 Indians are everywhere and nowhere in the US South Cloaked by a rhetoric of disappearance after Indian Removal actual southeastern tribal groups are largely invisible but immortalized in regional mythologies genealogical lore romanticized stereotypes and unpronounceable place names These imaginary Indians compose an ideological fiction inextricable from that of the South itself Often framed as hindrances to the Cotton Kingdom Indians were in fact active participants in the plantation economy and chattel slavery before and after Removal Dialectical tropes of Indigeneity linger in the white southern imagination in order to both conceal and expose the tangle of land labor and race as formative disruptive categories of being and meaning This book is not finally about the recovery of the region s lost Indians but a reckoning with their inaccessible traces ambivalent functions and the shattering implications of their repressed significance for modern southern identity *Assessment of Grassland Ecosystem Conditions in the Southwestern United States: Wildlife and fish* , 2004 Volume 2 Wildlife and fish Security Strategies and American World Order Birthe Hansen, Peter Toft, Anders Wivel, 2008-10-01 This book analyses security strategies in the American world order systematically comparing Russian Middle Eastern and European policies The main finding is that the loss of relative power has decisive importance for the security strategies of states but that particular strategies can only be explained when relative power is combined with ideology and the probability of military conflict Research on the unipolar world order has focused largely on the general dynamics of the system and the actions of the American unipole By contrast this book focuses on states that lost out relatively as a consequence of unipolarity and seeks to explain how this loss has affected their security strategies Thus in essence the book tells the other side of the story about the contemporary world order In addition it makes an important theoretical contribution by systematically coupling relative ideology and relative security with relative power and exploring their explanatory value This book will be of great interest to students of international relations security studies and foreign policy **Discovering Texas History** Bruce A. Alloys Marin R. Sullivan, 2022-03-22 A new look at the interrelationship of architecture and sculpture during one of the richest periods of American modern design *Alloys* looks at a unique period of synergy and exchange in the postwar United States when sculpture profoundly shaped architecture and vice versa Leading architects such as Gordon Bunshaft and Eero Saarinen turned to sculptors including Harry Bertoia Alexander Calder Richard Lippold and Isamu Noguchi to produce site determined large scale sculptures tailored for their buildings highly visible and well traversed threshold spaces The parameters of these spaces atriums lobbies plazas and entryways led to various designs like sculptural walls ceilings and screens that not only embraced new industrial materials and processes but also demonstrated art s ability to merge with lived architectural spaces Marin Sullivan argues that these sculptural commissions represent an alternate history of midcentury American art Rather than singular masterworks by lone geniuses some of the era s most notable spaces Philip Johnson s Four Seasons Restaurant in Mies van der Rohe s Seagram Building Max Abramovitz s Philharmonic Hall at Lincoln Center and Pietro Belluschi and Walter Gropius s Pan Am Building would be diminished without the collaborative efforts of architects and artists At the same time the artistic creations within these spaces could not exist anywhere else Sullivan shows that the principle of synergy provides an ideal framework to assess this pronounced relationship between sculpture and architecture She also explores the afterlives of these postwar commissions in the decades since their construction A fresh consideration of sculpture s relationship to architectural design and functionality following World War II *Alloys* highlights the affinities between the two fields and the ways their connections remain with us today

Breaking the Appalachian Barrier John Hrastar, 2018-03-12 In 1750 the Appalachian Mountains were a formidable barrier between the British colonies in the east and French territory in the west

passable only on foot or horseback It took more than a century to break the mountain barrier and open the west to settlement In 1751 a private Virginia company pioneered a road from Maryland to Ohio challenging the French and Indians for the Ohio country Several wars stalled the road which did not start in earnest until after Ohio became a state in 1803 The stone paved Cumberland Road from Cumberland Maryland to Wheeling Virginia was complete by 1818 and over the next 30 years was traversed by Conestoga wagons and stagecoaches The Baltimore and Ohio Railroad the first general purpose railroad in the world started in Baltimore in the 1820s and reached Wheeling by 1852 uniting east and west

The Northern Cheyenne Exodus in History and Memory James N. Leiker, Ramon Powers, 2012-11-09 The exodus of the Northern Cheyennes in 1878 and 1879 an attempt to flee from Indian Territory to their Montana homeland is an important event in American Indian history It is equally important in the history of towns like Oberlin Kansas where Cheyenne warriors killed more than forty settlers The Cheyennes in turn suffered losses through violent encounters with the U S Army More than a century later the story remains familiar because it has been told by historians and novelists and on film In *The Northern Cheyenne Exodus in History and Memory* James N Leiker and Ramon Powers explore how the event has been remembered told and retold They examine the recollections of Indians and settlers and their descendants and they consider local history mass media treatments and literature to draw thought provoking conclusions about how this story has changed over time The Cheyennes journey has always been recounted in melodramatic stereotypes and for the last fifty years most versions have featured noble savages trying to reclaim their birthright Here Leiker and Powers deconstruct those stereotypes and transcend them pointing out that history is never so simple The Cheyennes flight they write had left white and Indian bones alike scattered along its route from Oklahoma to Montana In this view the descendants of the Cheyennes and the settlers they encountered are all westerners who need history as a way of explaining the bones and arrowheads that littered the plains Leiker and Powers depict a rural West whose diverse peoples Euro American and Native American alike seek to preserve their heritage through memory and history Anyone who lives in the contemporary Great Plains or who wants to understand the West as a whole will find this book compelling
